Nations And Nationalism Ernest Gellner:

Nations and Nationalism Ernest Gellner, 2008 Originally published as hbk Malden MA Blackwell Pub 2006 Nations and Nationalism Ernest Gellner, 1983 This thoughtful and penetrating book addressed to political scientists sociologists historians and anthropologists interprets nationalism in terms of its social roots which it locates in industrial social organization Professor Gellner asserts here that a society's affluence and economic growth depend on innovation occupational mobility the effectiveness of the mass media universal literacy and an all embracing educational system based on a shared standard idiom These factors taken together govern the relationship between culture and the state Political units that do not conform to the principle one state one culture feel the strain in the form of nationalistic activity Nations and Nationalism Ernest Gellner, 2006 This updated edition of Ernest Gellner's classic exploration of the roots of nationalism includes an extended introduction from John Breuilly tracing the way the field has changed over the past two decades As pertinent today as it was when it was first published in 1983 Argues that nationalism is a product of industrialization The new edition includes references to important work on nationalism published since 1983 Second Edition not available in the USA

An Analysis of Ernest Gellner's Nations and Nationalism Dale Stahl, 2017-07-05 To the dismay of many commentators who had hoped the world was evolving into a more tolerant and multicultural community of nations united under the umbrellas of supranational movements like the European Union the nationalism that was such a potent force in the history of the 20th century has made a comeback in recent years Now more than ever it seems important to understand what it is how it works and why it is so attractive to so many people A fine place to start any such exploration is with Ernest Gellner's seminal *Nations and Nationalism* a ground breaking study that was the first to flesh out the counter intuitive but enormously influential thesis that modern nationalism has little if anything in common with old fashioned patriotism or loyalty to one's homeland Gellner's intensely creative thesis is that the nationalism we know today is actually the product of the 19th century industrial revolution which radically reshaped ancient communities encouraging emigration to cities at the same time as it improved literacy rates and introduced mass education Gellner connected these three elements in an entirely new way contrasting developments to the structures of pre industrial agrarian economies to show why the new nationalism could not have been born in such communities He was also successful in generating a typology of nationalisms in an attempt to explain why some forms flourished while others fizzled out His remarkable ability to produce novel explanations for existing evidence marks out *Nations and Nationalism* as one of the most radical stimulating and enduringly influential works of its day

Nations and Nationalism Dale J. Stahl, 2017-07-05 Ernest Gellner a Jew who escaped from Czechoslovakia in 1939 after Hitler invaded knew first hand the catastrophic effects of excessive nationalism and he was determined to understand the phenomenon that had shaped so much of 20th century history *Nationalism* Ernest Gellner, 1997-08-01 A defining force in world history nationalism remains an inescapable feature of a modern condition It has underpinned the emergence of many

states and the conflict it has often generated has caused enormous suffering both directly and indirectly Nationalism remains a powerful influence today in the former Yugoslavia and the successor states of the Soviet Union it has instigated great violence and atrocity In this incisive and provocative book completed just before his death Ernest Gellner described as one of the last of the great central European polymath intellectuals by the Financial Times explores the phenomenon of nationalism tracing its emergence and roots in the modern industrialized nation state its links with romanticism and its creation of national myths He investigates its various manifestations and reveals how in long established states such as France it has been relatively benign while in Eastern Europe in particular where nationalist feeling preceded the emergence of modern states its influence has been far more problematic and at times disastrous Finally the book explores the prospects of minimizing the influence of nationalist feeling and cautiously anticipates the possibility of its decline in this decade of continuing atrocities and ethnic cleansing Lucid and direct Gellner's work combines politics history philosophy and anthropology with the multidisciplinary flair for which he was renowned As nationalism continues to inform contemporary politics often with vicious and tragic results Gellner's last words on the subject are essential reading

Encounters With Nationalism Ernest Gellner, 1994 The forecast demise of nationalism under the new moral orders of communism and internationalism has proved illusory In the present century to an extent greater perhaps than in all others nationalism has been the dominant force in the affairs of humankind Why should this have been Why is it that a national identity should continue to be the aspiration of almost all peoples without one and at the same time the justification in the process of obtaining securing and expanding it for casting aside every trace and tradition of civility In *Encounters with Nationalism* Ernest Gellner seeks some answers His approach is to consider first the ideas of the main modern thinkers on the subject from Marx List Malinowski and Carr to Masaryk Heidegger Patocka Hroch Havel and Said He examines the origins subjects and context of their writings their interactions with culture and politics and their influence both on theory and on events The range is wide covering Eastern Western and Islamic societies and includes extensive discussions of the related themes of civil society theocracy communism imperialism capitalism and liberalism Professor Gellner is never less than trenchant He is concerned here not only to understand but to criticize He confronts several powerful and fashionable notions that fuel and or attempt to explain contemporary nationalism among them postcolonialism On the one hand he exposes their incoherence and irresponsibility on the other he places them alongside ideas of real currency Nor does he evade the controversy surrounding the nature of judgement itself the reader will also find here concise and penetrating discussions of relativism pluralism objectivity and the possibility of universal values

The Ernest Gellner Nationalism

Lecture, 2004

Ernest Gellner

John A. Hall, 2014-06-10 Ernest Gellner 1925 95 was a multilingual polymath and a public intellectual who set the agenda in the study of nationalism and the sociology of Islam Having grown up in Paris Prague and England he was also one of the last great Jewish thinkers from Central Europe to experience directly the impact of the Holocaust His intellectual trajectory differed from that of similar thinkers both in producing a highly integrated philosophy of modernity and in combining a respect for nationalism with an appreciation of the power of modern science Gellner was a fierce opponent in private as well as in public of such contemporaries as Michael Oakeshott Isaiah Berlin Charles Taylor Noam Chomsky and Edward Said As this definitive biography shows he was passionate in the defense of reason against every form of relativism a battle that his intellectual inheritors continue to this day

Geography of Hope Pierre Birnbaum, 2008

Arguing Comparative Politics Alfred C.

Stepan, 2001 This volume brings together new and classic articles by one of the leading scholars in comparative politics The articles focus in particular on the nature of contemporary democracy and its prospects The volume begins with a personal analysis of the intellectual and often political reasons why and how Stepan chose to engage in certain critical arguments over the last thirty years The volume is then divided into three sections each with a distinctive theme state and society constructing polities and varieties of democracies The introduction and articles ask whether both for intellectual and political reasons there are strong grounds for questioning both Rawls and Huntington on religion and democracy Riker on federalism and Gellner on multinationalism The volume contains articles on civil society political society economic society the military and a usable state The possibility of multiple and complementary political identities is argued for The incentive systems and political practices of the three macro constitutional frameworks for democratic government parliamentarianism presidentialism and semi presidentialism are compared and contrasted

All That Glitters is not Gold - The Impact of Frustrated Consumerism on German Reunification Christin Bimberg, 2009-09-28 Bachelor Thesis from the year 2006 in

the subject History of Europe Newer History European Unification grade A Marshall University course History Senior Seminar language English abstract Since the beginning of modern nationhood nationalism has been an important factor in building a nation According to Ernest Gellner nations are the artefact of men's convictions and loyalties and solidarities Nations are thus of big importance for people's identity After World War II the notion of nationalism became a complicated concept for most Germans One reason was that people who were nationalistic were condemned by others because of the horrible things done by the Hitler regime Another complication with post World War II German nationalism was the division of Germany itself Due to that division Germans with the same history and culture were divided by political boundaries

Gellner argues that this harms nationalism immensely Yet most Germans did not see the division as a permanent condition The East German attitude in this matter is especially interesting Despite minor changes in opinion over time the ordinary East German citizen felt that he or she was part of a single German nation Actions taken by the East German government aimed at full independence and even isolation from West Germany However East Germans did not go along with this They expressed their desire for a single German nation in many fields one of them consumer culture The population did not support the official policy of rejecting and ignoring West German and other products but wanted to be able to enjoy the Western lifestyle This frustrated desire combined with the shortcomings of production and supply in the GDR was the final problem that apart from the breakdown of the Soviet Union and the East German economy led to the eventual collapse of the German Democratic Republic

Anthropology and Politics Ernest Gellner, 1995-12-04

Ernest Gellner explores here the links between anthropology and politics and shows just how central these are The recent postmodernist turn in anthropology has been linked to the expiation of colonial guilt Traditional functionalist anthropology is characteristically regarded as an accessory to the crime and anyone critical of the relativistic claims of interpretative anthropology as Ernest Gellner is is likely to be charged as he sometimes is with being an ex post imperialist Ernest Gellner argues that cultures are crucially important in human life as constraining systems of meaning Cultural transition means that

the required characteristics are transmitted from generation to generation leading he shows to both greater diversity and to far more rapid change than is possible among species where transmission is primarily by genetic means But the relative importance of semantic and physical compulsion needs to be explored rather than pre judged The weakness of idealism which at present operates under the name of hermeneutics is that it underplays the importance of coercion and that it presents cultures as self justifying and morally sovereign this line of argument the author demonstrates is fundamentally flawed

The Church as Nation Kjell Blücker, 2000 **Mapping the Nation** Gopal Balakrishnan, 2012-11-13

In nearly two decades since Samuel P Huntington proposed his influential and troubling clash of civilizations thesis nationalism has only continued to puzzle and frustrate commentators policy analysts and political theorists No consensus exists concerning its identity genesis or future Are we reverting to the petty nationalisms of the nineteenth century or evolving into a globalized supranational world Has the nation state outlived its usefulness and exhausted its progressive and emancipatory role Opening with powerful statements by Lord Acton and Otto Bauer the classic liberal and socialist positions respectively Mapping the Nation presents a wealth of thought on this issue the debate between Ernest Gellner and Miroslav Hroch Gopal Balakrishnan s critique of Benedict Anderson s seminal Imagined Communities Partha Chatterjee on the limitations of the Enlightenment approach to nationhood and contributions from Michael Mann Eric Hobsbawm Tom Nairn and Jürgen Habermas
