Native Americans are indigenous people living in the Northern part of America within the boundaries of the current continental US, in Hawaii Island State, and in some parts of Alaska. They include various distinct ethnic groups and tribes, who survive as integral political communities. They sometimes refer to themselves as American Indians, who are scattered geographically. To them, a state of health exists when an individual lives in totality with nature. Sickness is not viewed as an alteration in one's physiological state, rather as an imbalance between the ill individual and supernatural forces or nature in general. Their medicine men or women, called 'shaman' are conducted in case of an illness (Barry, 2000).

Traditional healing systems are meant for balancing the body, spirit, and mind within the community context of the Native Americans. Contrary to the Western advance to health and healing, this group of people finds it odd to isolate one part of a human being and try by all means to heal that part, a holistic approach that has been practiced for a long time. Their survival depends on their wisdom of the connectedness and interrelatedness of everything in
