Handbook on Climate Change Vulnerability, Environments and Communities Fiona Miller, Krishna K. Shrestha, Sarah Wright, 2025-10-07 This thought provoking Handbook explores the spatially and socially differentiated nature of climate change vulnerability Expert authors discuss the ways that climate change vulnerability is materially and discursively produced as well as the agency capacity and resilience of affected communities This title contains one or more Open Access chapters

Marine Biodiversity Conservation Keith Hiscock, 2014-08-21 Effective marine biodiversity conservation is dependent upon a clear scientific rationale for practical interventions This book is intended to provide knowledge and tools for marine conservation practitioners and to identify issues and mechanisms for upper level undergraduate and Masters students It also provides sound guidance for marine biology field course work and professionals The main focus is on benthic species living on or in the seabed and immediately above rather than on commercial fisheries or highly mobile vertebrates Such species including algae and invertebrates are fundamental to a stable and sustainable marine ecosystem The book is a practical guide based on a clear exposition of the principles of marine ecology and species biology to demonstrate how marine conservation issues and mechanisms have been tackled worldwide and especially the criteria structures and decision trees that practitioners and managers will find useful Well illustrated with conceptual diagrams and flow charts the book includes case study examples from both temperate and tropical marine environments
