The Earth as a System

Introduction to Earth's System

The Earth is considered a system because it consists of multiple interconnected components working together. These components are grouped into four distinct spheres, each playing a crucial role in maintaining life and Earth's processes. These spheres are the *lithosphere*, *hydrosphere*, *biosphere*, and *atmosphere*.

Key Terms

- **System:** A group of interconnected components working together for a common purpose.
- **Lithosphere:** The Earth's solid crust and the upper part of the mantle, consisting of rocks, minerals, and soil.
- **Hydrosphere:** All the water on Earth, including oceans, rivers, lakes, glaciers, and underground water.
- **Atmosphere:** The layer of gases surrounding the Earth, primarily consisting of nitrogen and oxygen.
- **Biosphere:** All living organisms on Earth, including plants, animals, and microorganisms.

McDonald, 2022-01-25 This edited volume brings together a broad range of international science education studies focusing on the interplay of teaching and learning science. It recognizes the complexity present in today's education associated with major science-related issues faced by society such as climate change, diseases, and pandemics, global conflicts over energy, food, and water. The studies discussed in this volume are focused on presenting different opportunities to teach these convoluted matters in order to find simplicity within the complexity and make it accessible to learners. They bring together the challenges of preparing the students of today to become scientifically informed citizens of tomorrow. **OECD Reviews of Evaluation and Assessment in**

This well-researched volume including interviews with students from the profiled countries provides a wealth of information about the specific schooling traditions, practices, circumstances, and expectations that follow these individuals to their new homes in North America and influence their learning experience. The author has focused her research on 18 countries that contribute a majority of refugees and immigrants to the United States: Afghanistan, Bosnia Herzegovina, Croatia, the Dominican Republic, Ecuador, El Salvador, Ethiopia, Guatemala, Honduras, India, Iran, Laos, Liberia, Peru, Somalia, Sudan, and the Ukraine. Each country profile features statistics about the country, a historical synopsis, an overview of the country's official education policy, cultural perspectives, and a problem solution section containing classroom strategies. The linguistic systems of the languages featured are also included for teacher reference. Also included is information about teacher-student relationships, discipline, and class management and appropriate non-verbal communication. This volume provides invaluable insight into refugee and immigrant students' cultural and educational backgrounds and gives instructors the tools to translate this information into effective classroom strategies. **University of Michigan Official Publication** University of
