Natural Products Research Journal:

Analytical Techniques for Natural Product Research Satyanshu Kumar, 2015-12-15 Plants are important source of lead molecules for drug discovery. These lead molecules serve as starting materials for laboratory synthesis of drug as well as a model for production of biologically active compounds. Phytochemical processing of raw plant materials is essentially required to optimize the concentration of known constituents and also to maintain their activities. Extraction techniques and analytical techniques have played critical roles in phytochemical processing of raw materials. Extraction technologies from conventional extraction to green extraction as well as analytical techniques from single technique to hyphenated coupled techniques most frequently used in phytochemistry laboratories are covered in the book. **Marine Natural Products**

Research in South-East Asia Lik Tong Tan, Novriyandi Hanif, 2025-09-30 This unprecedented volume offers a comprehensive review of marine natural products research across Southeast Asia, a region teeming with untapped marine biodiversity. It provides an extensive survey of the chemistry and biology of specialized metabolites derived from marine organisms such as sponges, tunicates, soft corals, and marine microbes. Highlighting both the scientific advances and critical gaps, the book identifies strategic areas for future research and drug discovery initiatives. With its regional focus and collaborative insights, this edited collection serves as a vital resource for researchers, policymakers, and industry stakeholders engaged in marine biotechnology and sustainable pharmaceutical development in one of the world's most biodiverse marine ecosystems. *Natural Products Desk Reference* John Buckingham, 2015-11-18 Written by the team that brought you the

prestigious Dictionary of Natural Products (DNP), the Natural Products Desk Reference provides a concise overview of the key structural types of natural products and their interrelationships. A structurally diverse group ranging from simple aliphatic carbon chains to high molecular weight proteins. Lead Generation Approaches in Drug Discovery Zoran Rankovic, Richard Morphy, 2010-04-07 An integrated overview of modern approaches to lead discovery. Lead generation is increasingly seen as a distinct and success-determining phase of the drug discovery process. Over recent years, there have been major advances in the understanding of what constitutes a good lead compound and how to improve the chances of finding such a compound. Written by leading scientists and established opinion leaders from industry and academia, this book provides an authoritative overview of the field as well as the theory, practice, and scope of the principal Lead Generation Approaches in Drug Discovery, including: The evolution of the lead discovery process; key concepts; current challenges and future directions; Strategies and technologies driving the high-throughput screening (HTS) approach to lead discovery, including the shifting paradigms in the design of compound collections and best practice in the hit confirmation process; Knowledge-based in silico or virtual screening; Theory and practice of the fragment-based approach to lead discovery; The opportunities and challenges presented by multi-target drug discovery (MTDD); De novo design of lead compounds and new approaches to estimating the synthetic accessibility of de novo designed molecules; The impact of natural products on drug

discovery and potential of natural product like compounds for exploring regions of biologically relevant chemical space Using early screening of hits and leads for metabolic pharmacokinetic and toxicological liabilities to reduce attrition during the later phases of drug discovery The utility of parallel synthesis and purification in lead discovery With each topic supported by numerous case studies this is indispensable reading for researchers in industry and academia who wish to keep up to date with the latest strategies and approaches in drug discovery Natural Products and Botanical Medicines of Iran Reza Eddin
