Environmental and Natural Resources Economics Steven Hackett, Sahan T. M. Dissanayake, 2014-12-18 Extensively revised and updated this popular text presents an accessible yet rigorous treatment of environmental and natural resources economics including climate change and the economics of sustainability Completely revised and updated the fourth edition now includes new figures and tables definitions to assist the reader and updated policy information New advances in the science economics and policy approaches to climate change have been integrated into essentially all new chapters on incentive regulation and global climate change This innovative textbook integrates economics with science and public policy in a balanced and accessible way that will be appreciated by students from disciplines ranging from economics and natural resources management to environmental studies and energy policy

Natural Hazards: Earth's Processes as Hazards, Disasters, and Catastrophes (4th Edition) Edward Keller, Duane DeVecchio, 2015-05-20

Introduction to Forestry and Natural Resources Donald L. Grebner, Pete Bettinger, Jacek P. Siry, Kevin Boston, 2021-01-19 Introduction to Forestry and Natural Resources Second Edition presents a broad completely updated overview of the profession of forestry The book details several key fields within forestry including forest management economics policy utilization and forestry careers Chapters deal specifically with forest regions of the world landowners forest products wildlife habitats tree anatomy and physiology and forest disturbances and health These topics are ideal for undergraduate introductory courses and include numerous examples and questions for students to ponder There is also a section dedicated to forestry careers Unlike other introductory forestry texts which focus largely on forest ecology rather than practical forestry concepts this book encompasses the economic ecological and social aspects thus providing a uniquely balanced text The wide range of experience of the contributing authors equips them especially well to identify missing content from other texts in the area and address topics currently covered in corresponding college courses Covers the application of forestry and natural resources around the world with a focus on practical applications and graphical examples Describes basic techniques for measuring and evaluating forest resources and natural resources including fundamental terminology and concepts Includes management policies and their influence at the local national and international levels

Indigenous STEM Education Pauline W. U. Chinn, Sharon Nelson-Barber, 2023-08-04 This book explores ways in which systems of local knowledge culture language and place are foundational for STEM learning in Indigenous communities It is part of a two volume set that addresses a growing recognition that interdisciplinary cross cultural and cross hybrid learning is needed to foster scientific and cultural understandings and move STEM learning toward more just and sustainable futures for all learners Themes of learning from elders through practice and place based experiences are found across cultures Each chapter brings a uniquely Indigenous

point of view to the educational transformation efforts taking place in these distinct contexts In the second section the chapters use authentic research stories to explain many ways in which regular disciplinary policies and practices can impact Indigenous students participation in STEM classrooms and careers These authors go on to discuss ways to engage learners in STEM activities that are interconnected with the contexts of their lives *Foundations of Agricultural Education, Fourth Edition* B.
