The Bahamas International Monetary Fund. Western Hemisphere Dept.,2018-05-14 This Selected Issues paper makes the case for a rules based fiscal framework for The Bahamas and discusses its design calibration and implementation The IMF staff recommends adopting a headline deficit ceiling and a cap on current expenditure growth both calibrated to guide debt toward a suitable medium term anchor while allowing room for stabilization A headline deficit target is simpler to communicate and monitor than a structural balance rule Such a framework would allow expanding capital spending up to the limit provided by the deficit ceiling in the event of improvements in revenue performance Moreover in line with best practices the framework should be anchored around a pre defined medium term debt target that will guide the calibration of proposed operation rules [Insights in Coronavirus Disease \(COVID-19\) - Surveillance, Prevention and Treatment](#) Marc Jean Struelens,Zisis Kozlakidis,2022-11-10 **Disaster Risk Management** Prof. Dr. Vladimir M. country and abroad into the text of the textbook to enrich it with scientifically verified facts Also invaluable experience in working with students has helped to release the textbook from the additional scientific reflection that would make it difficult to acquire basic knowledge in the field of disaster risk management The first edition of the textbook also has its limitations which are reflected in the insufficient theoretical development of the scientific discipline which is relatively young and should contribute to creating additional conditions for the construction of the theory I would like to emphasize that the textbook represents the first such publication published in the Serbian language in our region which will greatly improve the knowledge and professional competencies of the general professional public Normal Instructor ,1930 Normal Instructor and Teachers World ,1930
