**Reforming WTO Rules on State-Owned Enterprises** Yingying Wu, 2019-01-28 This book argues that the trade distorting effects of advantages associated with SOEs are more severe from an economic perspective and the behavior of SOEs after receiving advantages is of more concern compared to private owned enterprises POEs The premise is that the existence of SOEs per se is not the essential problem rather the underlying problems are i the disproportionate granting of advantages to SOEs compared to POEs and ii the behavior of SOEs once they receive advantages The book offers a systematic analysis focusing on the various advantages granted to SOEs and their subsequent behavior Its detailed analysis reveals the inadequacy of current WTO rules and is complemented by a number of concrete proposals

**Compound Containment** Dong Jung Kim, 2022-03-07 When does a reigning great power of the international system supplement military containment of a challenging power by restricting its economic exchanges with that state Scholars of great power politics have traditionally focused on examining a reigning power s military containment of a challenging power In direct contrast Compound Containment demonstrates that these conventional studies are flawed without a sound understanding of the multilayered aspects of containment strategy in great power politics Since economic capacity and military power are intimately linked to one another countering a challenging power requires addressing both economic and military dimensions Nonetheless this nexus of security and economy in a reigning power s response to a challenging power cannot be explained by traditional theories that dominate research in international security Author Dong Jung Kim fills a gap in the scholarship on great power competition by investigating when a reigning power will make its military containment of a challenging power compound by simultaneously employing restrictive economic measures Its main theoretical claims are corroborated by an analysis of key historical cases of reigning power challenging power competition This book also offers policy prescriptions for the United States by examining whether the United States is in a position to complement military containment of China with restrictive economic measures
