

IELTS Academic Writing Task 1

July 2023

You should spend about 20 minutes on this task.

The plans below show the layout of the ground floor of a school library in 2001 and how it changed as a result of renovations in 2009.

Summarize the information by selecting and reporting the main features and make comparisons where relevant.

Write at least 150 words.

Illustrated in the plans is the original layout of a library in a school in 2001 and its refurbishment in 2009. Overall, there were significant changes, particularly with the addition of several new categories of books.

On the right behind the librarian's desk, which had not been moved, the newspapers and magazines section was replaced by movies and DVDs, and additionally, computers were installed behind the front desk. There used to be eight small tables in the center of the room, but these were converted into four large ones and behind these, a children's area was added.

At the back of the facility there was a section for children's books, which had been formerly allocated to fiction books. The most noticeable change to the library was the expansion of book categories on the left of the room. In 2001 there were only two types of books available, history and self-help however, by 2009 four new book categories were added.
