Ks2 Sat Papers 2013:

Reading Development and Teaching Morag Stuart, Rhona Stainthorp, 2015-12-07 This textbook will prove invaluable to teacher educators, teachers, educational psychologists and any professional who is involved with teaching children to read. It provides a detailed examination of the processes that are involved in achieving fluent word reading skills and ability to comprehend written texts. Understanding these processes and their development empowers teachers to select appropriate evidence-based teaching strategies and thus teach children more effectively. The book is in four parts. Part 1 provides the reader with a Tutorial Review covering essential knowledge about language and presenting the two dimensions of the Simple View of Reading. Part 2 concentrates on the word reading dimension with chapters on processes in skilled word reading, the development of these processes and practical advice on research-validated teaching methods to develop children's word reading skills. Part 3 turns to the language comprehension dimension with chapters on the comprehension of oral and written language and on teaching reading comprehension. Part 4 introduces the reader to assessment practices and methods of identifying children with difficulties in either or both dimensions of the Simple View and considers children with word reading difficulties and children with specific comprehension difficulties, describing effective evidence-based interventions for each type of difficulty.

The Linguistic Challenge of the Transition to Secondary School Alice Deignan, Duygu Candarli, Florence Oxley, 2022-12-30 This book provides a unique analysis and description of the linguistic challenges faced by school students as they move from primary to secondary school, a major transition which some students struggle with emotionally and academically. The study draws on a bespoke corpus of 2.5 million words of written materials and transcribed classroom recordings provided by the project's partner schools, combining quantitative and qualitative approaches to the corpus data to explore linguistic variation across school levels, registers and subjects. It describes the procedures of corpus compilation and analysis of written and spoken academic language, showing how modern corpus tools can be applied to this far-reaching social and educational issue, uncovering differences and similarities between the academic language that school children are exposed to at primary and secondary school, contrasting this against the backdrop of the non-academic language that they encounter outside school. This book is important reading for advanced students and researchers in corpus linguistics, applied linguistics and teacher education. It carries implications for policymakers and schools looking to support students at this critical point in their schooling.
