Life Cycle Assessment (LCA)--quo Vadis? Stefan Schaltegger, 1996

Life Cycle Assessment in Industry and Business Paolo Frankl, Frider Rubik, 1999-11-26 1 1 Life Cycle Assessment LeA a fascinating and sophisticated tool The greening of the economy is not a new task but it is a challenge

for which a lot of tasks still have to be done It is known that the main source of environmental deterioration by industry is not any more the chimneys and other process related emissions but the products and services produced Products are regarded as carriers of pollution they are not only a potential source of pollution and waste during their use they are also a cause of resource depletion energy consumption and emissions during their life starting with the extraction of the raw materials and ending with their disposal i.e. connecting production and consumption stages The challenge of these decades is now the greening of products and services The new focus on products by Oosterhuis/Rubik Scholli 1996 was introduced as a policy approach of shared responsibility in which different actors are involved along the life cycle of a product each having specific responsibilities

Life Cycle Assessment: New Developments And Multi-disciplinary Applications Hsien Hui Khoo, Reginald B H Tan, 2022-01-19 Life cycle assessment LCA is internationally accepted as a core topic in the field of environmental management in various industries for obtaining a complete picture of the environmental impacts of products or processes In contrast to other types of environmental management tools or sustainability assessment methods LCA methodologies take a holistic approach to include all relevant processes starting from the extraction of natural resources to various manufacturing stages that lead to the final product Following an evidence approach LCA is underpinned by quantitative methodologies to study real world problems and uncover hidden impacts beyond the conventional boundary of a single stage manufacturing system to develop sustainable strategies that consider regional or global production chains This book offers multi disciplinary perspectives of new LCA developments and applications spanning from data variability to ecosystem services plus the evaluation of the net greenhouse gas from Carbon Capture and Utilization CCU methods and waste management Perspectives of green chemistry principles via LCA combined with life cycle atom economy approaches are explored Industrial symbiosis concepts LCA as an Entrepreneurial Tool for Business Management and Green Innovations and blockchain enabled LCA are also presented
