**Handbook of Positive Psychology** C. R. Snyder,Shane J. Lopez,2001-12-20 Psychology has long been enamored of the dark side of human existence rarely exploring a more positive view of the mind What has psychology contributed for example to our understanding of the various human virtues Regrettably not much The last decade however has witnessed a growing movement to abandon the exclusive focus on the negative Psychologists from several subdisciplines are now asking an intriguing question What strengths does a person employ to deal effectively with life The Handbook of Positive Psychology provides a forum for a more positive view of the human condition In its pages readers are treated to an analysis of what the foremost experts believe to be the fundamental strengths of humankind Both seasoned professionals and students just entering the field are eager to grasp the power and vitality of the human spirit as it faces a multitude of life challenges The Handbook is the first systematic attempt to bring together leading scholars to give voice to the emerging field of positive psychology

**The Education Systems of Europe** Wolfgang Hörner,Hans Döbert,Botho von Kopp,Wolfgang Mitter,2007-05-03 Education is a paradoxical phenomenon On the one hand it is universal as since the period of Enlightenment it has been declared universal good for everybody Mo over we learnt by historical research following the ideas of world system theory that since this time as far as its main structures are concerned compulsory state education given by professional teachers in classrooms it took even universal traits However on the other hand the fact that education became state education organised or at least controlled by the state was the beginning of another tradition line education in the form of state organised educational institutions became a means of creating national identity Universal inclusion as for the light of reason shining for everybody is opposed to more or less nationalist exclusion of all the others shaping the feature of a particular nation state with a particular educational system

This fundamental dialectical tension between the universal and the particular was one of the important motives to make this handbook. One of the central issues of the country studies is precisely to display the relationship between universal values and the search for national identity. Another motive is given by the European dimension of the handbook. *Botswana, post report*, 1985.
