I can represent changes in matter with a balanced chemical or net ionic equation: a. For physical changes; b. For given information about the identity of the reactants and/or product. For ions in a given chemical reaction I can represent a given chemical reaction or physical process with a consistent particulate model. I can explain the relationship between macroscopic characteristics and bond interactions for: a. Chemical processes; b. Physical processes. I can explain changes in the amounts of reactants and products based on the balanced reaction equation for a chemical process. I can identify the equivalence point in a titration based on the amounts of the titrant and analyte, assuming the titration reaction goes to completion. I can identify a reaction as acid-base, oxidation-reduction, or precipitation. I can identify species as Brønsted-Lowry acids, bases, and/or conjugate acid-base pairs, based on proton-transfer involving those species.
