

# LIFE IN A GEOMETRICAL TOWN

## Materials Needed:

One 12" x 18" sheet of paper, ruler, protractor, compass, straightedge, colored pencils, scissors, glue, 12x18" paper, construction paper

## Before This Project:

1. Completely read the directions through before beginning. To gain an understanding of what you are going to do.
2. Before creating your final project, create a rough draft of your map on scratch paper. Use the rough draft to adjust and where things will go on the larger map (12" x 18" paper). Then use your rough draft as a guide to help you create your map. "Your rough draft doesn't do harm to us."
3. There are 10 neighborhoods. Each is worth 10 points, for a total of 100 points.

## Directions/Steps:

1. Draw 3 parallel roads and name them. The roads can be used to make up the example of the Avenue, High Street, William (Main) St. Your map will look much better if you use a ruler to draw the lines for your roads. Also make sure that all roads are the same width.
2. Draw 3 roads that are each perpendicular to at least one of the 3 parallel lines, and name these roads.
3. Draw 3 intersecting roads on your map. They may intersect each other, or any of the other roads. These roads intersect, but are not perpendicular. Name these roads.
4. Take a sheet of construction paper. Place your ruler diagonally on the paper. Mark at the 1", 1", and 1" measurements on both sides of the paper. Draw a straight line across the paper. Repeat place the ruler across the top of your paper. Mark at the 1" and 1" measurements. The line goes to the bottom of the paper. Use these points to draw straight lines to a grid on the paper.

You should now have 12 squares on your sheet of construction paper that are each 1" x 1". You will use these squares to create 10 different polygonal shapes, which you will cut out and glue onto your poster board. The shapes that you will need to create are:

Triangle	Square	Hexagon	Heptagon	Decagon
Pentagon	Nonagon	Octagon	Dodecagon	Tridecagon

5. The polygons created in step 4 are the buildings in your town. Each building needs to have a mathematical name on the paper.

**The Permaculture City** Toby Hemenway, 2015-07-17 Permaculture is more than just the latest buzzword it offers positive solutions for many of the environmental and social challenges confronting us And nowhere are those remedies more needed and desired than in our cities The Permaculture City provides a new way of thinking about urban living with practical examples for creating abundant food energy security close knit communities local and meaningful livelihoods and sustainable policies in our cities and towns The same nature based approach that works so beautifully for growing food connecting the pieces of the landscape together in harmonious ways applies perfectly to many of our other needs Toby Hemenway one of the leading practitioners and teachers of permaculture design illuminates a new way forward through examples of edge pushing innovations along with a deeply holistic conceptual framework for our cities towns and suburbs The Permaculture City begins in the garden but takes what we have learned there and applies it to a much broader range of human experience we re not just gardening plants but people neighborhoods and even cultures Hemenway lays out how permaculture design can help town dwellers solve the challenges of meeting our needs for food water shelter energy community and livelihood in sustainable resilient ways Readers will find new information on designing the urban home garden and strategies for gardening in community rethinking our water and energy systems learning the difference between a job and a livelihood and the importance of placemaking and an empowered community This important book documents the rise of a new sophistication depth and diversity in the approaches and thinking of permaculture designers and practitioners Understanding nature can do more than improve how we grow make or consume things it can also teach us how to cooperate make decisions and arrive at good solutions *The Book of Rural Life* Edward Mowbray Tuttle, 1925 **The Architectural Review**, 1910 Garden Cities and Town Planning Magazine George J. puts emphasis on the visual image of spaces and links space narrative and authorship into a multidimensional model of spatial compilation. It is a mosaic which gathers groups juxtaposes and re arranges spaces offering a reading of mosaic beyond an exclusive focus on narrative its nuances are examined in detail in different mosaics of Alejandro González Iñárritu, Atom Egoyan, Hou Hsiao hsien and Michael Haneke. Garden Cities & Town Planning, 1921. Impure Cinema Lúcia Nagib, Anne Jerslev, 2013-10-24. Impure Cinema goes back to Bazin's original title precisely for its defence of impurity applying it on the one hand to cinema's interbreeding with other arts and on the other to its ability to convey and promote cultural diversity. In contemporary progressive film criticism ideas of purity essence and origin have been superseded by favourable approaches to hybridization transnationalism multiculturalism and cross fertilizations of all sorts. Impure Cinema builds on this idea in novel and exciting ways as it draws on cinema's combination of intermedial and intercultural aspects as a means to bridge the divide between studies of aesthetics and culture. Film is revealed here as the location par excellence of media encounters mutual questioning and self dissolution into post medium experiments. Most importantly the book argues film's intermedial relations can only be properly understood if their cultural determinants are taken into account. Scholars and students of film cinefiles and students of the arts will discover here unexpected connections across many artistic practices. **Chambers's Journal of Popular Literature, Science, and Arts**, 1914. Thomas Mitchell, 1993. *Redefining Designing From Form to Experience* C. Thomas Mitchell. *Redefining Designing From Form to Experience* offers a comprehensive new theory of design in which user needs and wishes are central. This landmark work focuses on design in terms of human experience rather than physical form. The book offers a highly critical study of design philosophies that have emerged since industrialization modernism late modernism postmodernism and deconstruction. C. Thomas Mitchell points out how many designs particularly in architecture fail to suit their intended purpose not because of their style but because of the design process itself. Mitchell then reviews user responsive design methods which he calls design turned inside out. He explores collaborative contextual and intangible design and cites examples of each. International case studies illustrate up to the minute topics such as humanware softecnica the pattern language and soft design. Also featured is an interview with Brian Eno and graphic work by artists Christo and Robert Wilson. Many never before published illustrations enhance the book throughout. A broad synthesis of new thinking on design. *Redefining Designing From Form to Experience* will be of great interest to a wide range of professionals including architects planners and landscape architects as well as product interior and industrial designers. *A History of the County of Brecknock* Theophilus Jones, 1898. *Plan of Minneapolis*.
