Foundations of Biophilosophy Martin Mahner, Mario Bunge, 1997-05-20 Over the past three decades the philosophy of biology has emerged from the shadow of the philosophy of physics to become a respectable and thriving philosophical subdiscipline In their book the authors take a fresh look at the life sciences and their philosophy from a strictly realist and emergentist naturalist perspective They outline a unified and science oriented philosophical framework that enables them to clarify many foundational and philosophical issues in biology Thus this book should be of interest to both life scientists and philosophers and is suitable as a textbook for courses at the advanced levels as well as for independent study

This Thing Called Reason Benjamin K. Akih, 2025-05-06 This book offers a conceptual analysis of reason proposing a plausible theory to resolve persistent vagueness in the historical use of the concept The proposed theory leads to the view that reason is fundamentally subjective and dependent on non inferential matters of faith Despite the inherent subjectivity we can arrive at a consensus in reasoning exercises because we all participate in a universal minimum religion that grounds all reasoning True atheism is therefore impossible This analysis bears on debates about the relation between faith and reason as well as the relation between ethics based on reason and ethics based on sentiments The book further shows that this new and original view of religiously constrained reason ought to equally inform our thinking about applied ethics such as politics law and economics

The Fundamentals of Philosophy David Stewart,1996-05-01 [Fundamentals of Philosophy](#) Stewart,2008-09 *A Relational Metaphysic* H.H. Oliver,2012-12-06 C S Peirce s indictment that the chief cause of metaphysics backward condition is that its leading professors have been theologians Collected Papers 6 3 falls heavily at my door For it logians was out of reflection upon religious experience and its meaning that the present relational metaphysic was conceived My hope however is that its scope is sufficiently wider than its theological origins to justify its appearance as a work in philosophy Having been nurtured in existential philosophy and having reached some measure of maturity with the wise counsel of Professor Dr Fritz Buri of Basel I came to feel that theology as a modern discipline had reached an impasse owing to its overextended commitments to a subject object paradigm of thought Even those theologians who despaired of these ties seemed unable to find an independent alternative idiom for their ideas A second tension in my thinking resulted from the inordinate neglect by theologians of the natural world Also my natural interest in physical understanding seemed unfulfilled within the narrow confines of theology even of philosophical theology as then practiced As I turned decisively toward the study of modern physics and especially of cosmology a new world seemed to open up to me After extensive study with prominent astronomers and physicists it began to dawn on me that the new physics has devised conceptual paradigms of thought which could be generalized into a metaphysical system of universal interest
