*Smart Grids for Smart Cities, Volume 1* O. V. Gnana Swathika, K. Karthikeyan, Sanjeevikumar Padmanaban, 2023-07-05  
SMART GRIDS for SMART CITIES Written and edited by a team of experts in the field this first volume in a two volume set focuses on an interdisciplinary perspective on the financial environmental and other benefits of smart grid technologies and solutions for smart cities What makes a regular electric grid a smart grid It comes down to digital technologies that enable two way communication between a utility and its customers as opposed to the traditional electric grid where power flows in one direction Based on statistics and available research smart grids globally attract the largest investment venues in smart cities Smart grids and city buildings that are connected in smart cities contribute to significant financial savings and improve the economy The smart grid has many components including controls computers automation and new technologies and equipment working together These technologies cooperate with the electrical grid to respond digitally to our quickly changing electric demand The investment in smart grid technology also has certain challenges The interconnected feature of smart grids is valuable but it tremendously increases their susceptibility to threats It is crucial to secure smart grids wherein many technologies are employed to increase real time situational awareness and the ability to support renewables as well as system automation to increase the reliability efficiency and safety of the electric grid This exciting new volume covers all of these technologies including the basic concepts and the problems and solutions involved with the practical applications in the real world Whether for the veteran engineer or scientist the student or a manager or other technician working in the field this volume is a must have for any library

*Energy-saving Principles and Technologies for Induction Motors* Wenzhong Ma, Lianping Bai, 2017-11-29 A unique guide to the integration of three phase induction motors with the emphasis on conserving energy The energy saving principle and technology for induction motor is a new topic and there are few books currently available this book provides a guide to the technology and aims to bring about significant advancement in research and play an important role in improving the level of motor energy saving Includes new and innovative topics such as a case study of energy saving in beam pumping system and reactive compensation as a means of energy saving The authors have worked in this area for 20 years and this book is the result of their accumulated research and expertise It is unique in its integration of three phase induction motors with the emphasis on conserving energy Integrates the saving energy principle technology and method of induction motors with on site experiences showing readers how to meet the practical needs and to apply the theory into practice It also provides case studies and analysis which can help solve problems on site

**Advances in Control Power Systems and Emerging Technologies** Mohamed Bendaoud, Amine El Fathi, Farhad Ilahi Bakhsh, Siano Pierluigi, 2024-05-31 This edited book is an outcome of the selected papers presented at the International Conference on Electrical Systems Automation ICESA 2023 held from 29 to 30 May 2023 at the Faculty of Sciences and Technologies Al Hoceima Morocco This edited book is divided into two volumes This volume is divided into four parts each devoted to distinct yet

interconnected aspects of the subject matter The first part presents the control of electrical machines and power converters It covers a comparative study of different control approaches including Proportional Integral PI Fuzzy Logic and Neural Fuzzy Logic Controllers for Boost Converters It also presents an innovative approach for single phase half bridge inverters and improved direct torque control of dual three phase permanent magnet synchronous motors Part 2 of the book titled Control Systems Automation thoroughly explores advanced control and automation technologies in electrical systems These chapters collectively showcase the latest developments and research across various engineering domains Several control approaches have been discussed such as fuzzy control sliding mode control artificial neural networks ANN and machine learning The third part highlights emerging technologies and applications in various fields such as mobile robots industry 4 0 agriculture and health The chapters cover a wide range of topics including intelligent navigation for autonomous robots self driving car perception and pedestrian detection machine learning for cloud and IoT based smart agriculture outdoor navigation systems for micro tractors healthcare intelligent systems for melanoma image classification maximizing the performance of Light Emitting Diode Luminaires The research explores innovative solutions and technologies in different domains aiming to improve functionality in various applications Part 4 of this book is dedicated to Advanced Wireless Communication and Antenna Technology This part explores cutting edge developments and innovations in the realm of wireless communication and antenna design with a focus on their applications and impact in various fields

Advances in Control, Signal Processing and Energy Systems Tapan Kumar Basu, Swapan Kumar Goswami, Nandita Sanyal, 2019-09-14 This book comprises select proceedings of the National Conference on Control Signal Processing Energy and Power Systems CSPES 2018 The book covers topics on both theoretical control systems and their applications across engineering domains such as automatic control robotics and adaptive controller design It discusses several signal processing domains such as image speech biomedical signal processing and their applications in IOT control robotics power and energy systems The book emphasizes both conventional and non conventional energy environment and green processes as related to energy and power systems engineering The contents of this book will prove to be useful for students researchers academics and professionals
