

**Strategy 1: The Number Line**

After students have studied pages 1 and 2, ask students to work in pairs to create a number line graphing the given division problems. Once students have an understanding of how to label points, assign students to determine and graph points that represent the division quotients.

The same problem was presented a third time with the use of a number line below the number line for students to complete. This is presented as the second of two problems that students can complete for additional practice.

Page 2A**Problem 1: Number Line Problem with Division Equations**

Each student has a number line graph on page 1. Students will represent equations by their point locations relative to the number line's number line. Students will label the number line with the given equations. They will then graph the equations on the number line. They will then label the number line with the given equations. They will then label the number line with the given equations.

1. The number line below graph the equations on page 1. Complete the table.
