Meeting the Challenges to Measurement in an Era of Accountability Henry Braun, 2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4-8 Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district Comparatively little has been written about the measurement of achievement in the other grades and subjects This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all It addresses traditional end of course tests as well as alternative measures such as portfolios exhibitions and student learning objectives In each case issues related to design and development psychometric considerations and validity challenges are covered from both a generic and a content specific perspective The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment Edited by leading experts these books are comprehensive and practical resources on the latest developments in the field The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

The Urban Brain Nikolas Rose, Des Fitzgerald, 2022-03-22 Bridging the social and life sciences to unlock the mystery of how cities shape mental health and illness Most of the world's people now live in cities and millions have moved from the countryside to the rapidly growing megacities of the global south How does the urban experience shape the mental lives of those living in and moving to cities today Sociologists study cities as centers of personal progress and social innovation but also exclusion racism and inequality Psychiatrists try to explain the high rates of mental disorders among urban dwellers especially migrants But the split between the social and life sciences has hindered understanding of how urban experience is written into the bodies and brains of urbanites In *The Urban Brain* Nikolas Rose and Des Fitzgerald seek to revive the collaboration between sociology and psychiatry about these critical questions Reexamining the relationship between the city and the brain Rose and Fitzgerald explore the ways cities shape the mental health and illness of those who inhabit them Drawing on the social and life sciences *The Urban Brain* takes an ecosocial approach to the vital city in which humans live and thrive but too often get sick and suffer The result demonstrates what we can gain by a vitalist approach to the mental lives of those migrating to and living in cities focusing on the ways that humans make remakes and inhabit their urban lifeworlds
