Risk Regulation in the Internal Market Maria Weimer, 2019-03-13 This book offers a topical inquiry into the legal and political limits of EU regulation in the field of risk and new technologies surrounded by techno scientific complexity uncertainty and societal contestation It uses agricultural biotechnology as a paradigmatic example to illustrate the complex intertwinement between environmental public health economic and social concerns in risk regulation Weimer analyses the drawbacks of the EU approach to agricultural biotechnology showing that its reductionism i e the narrow understanding of GMO risks as well as the exclusion of broader societal concerns related to environmental and social sustainability has undermined both the legitimacy and effectiveness of EU regulation in this area Resistance to this approach however has also triggered legal innovations prompting us to re think EU internal market law including the way in which it manages the tensions between unity and diversity and between social and economic concerns This text offers fresh and original insights into how far the EU can go in harmonizing regulatory approaches to risk At the same time it proposes new ways of re thinking EU risk regulation to make it more responsive to different perspectives on risk and technology A unique feature of this book is that it contributes to various strains of scholarship including risk regulation internal market law public administration and studies of governance and regulation as well as connecting these themes to broader debates about the legitimacy of European integration and new ways of differentiated integration As a result it assists in re imagining the EU internal market and its regulation as a site of diversity

the changing nature and legacies of America's oldest public schools *The Nature of the Religious Right* Neall W. Pogue, 2022-04-15 In *The Nature of the Religious Right* Neall W. Pogue examines how white conservative evangelical Christians became a political force known for hostility toward environmental legislation. Before the 1990s, this group used ideas of nature to help construct the religious right movement while developing theologically based eco-friendly philosophies that can be described as Christian environmental stewardship. On the twentieth anniversary of Earth Day in 1990, members of this conservative evangelical community tried to turn their eco-friendly philosophies into action. Yet this attempt was overwhelmed by a growing number in the leadership who made anti-environmentalism the accepted position through public ridicule, conspiracy theories, and cherry-picked science. Through analysis of rhetoric, political expediency, and theological imperatives, *The Nature of the Religious Right* explains how ideas of nature played a role in constructing the conservative evangelical political movement, why Christian environmental stewardship was supported by members of the community for so long, and why they turned against it so decidedly beginning in the 1990s.

Islamic Ecumene David S. Powers, Eric Tagliacozzo, 2023-11-15 The essays in *Islamic Ecumene* address the ways in which Muslims from Morocco to Indonesia and from sub-Saharan Africa to the steppes of Uzbekistan are members of a broad cultural unit. Although the Muslim inhabitants of these lands speak dozens of languages, represent numerous ethnic groups, and practice diverse forms of Islam, they are united by shared practices and worldviews shaped by religious identity. To highlight these commonalities, the co-editors invited a team of scholars from a wide range of disciplines to examine Muslim societies in comparative and interconnected ways. The result is a book that showcases ethics, education, architecture, the arts, modernization, political resistance, marriage, divorce, and death rituals. Using the insights and methods of historians, anthropologists, literary critics, art historians, political scientists, and sociologists, *Islamic Ecumene* seeks to understand Islamic identity as a dynamic phenomenon that is reflected in the multivalent practices of the more than one billion people across the planet who identify as Muslims.
