church officials artisans developed their own cartographies in accordance with their own social political or administrative agendas These competing templates were created around units ranging from streets and islands to vicinities and landmarks Smail shows how the notarial template which privileged the street as the most basic marker of address gradually emerged as the cartographic norm This transformation he argues led to the rise of modern urban maps and helped to inaugurate the process whereby street addresses were attached to citizen identities a crucial development in the larger enterprise of nation building Imaginary Cartographies opens up powerful new means for exploring late medieval and Renaissance urban society while advancing understanding of the role of social perceptions in history **League of Nations Publications** ,1920
