Life Sciences PSeptember 2014:

Optimizing the Nation's Investment in Academic Research National Academies of Sciences, Engineering, and Medicine, Policy and Global Affairs, Board on Higher Education and Workforce, Committee on Science, Technology, and Law, Committee on Federal Research Regulations and Reporting Requirements: A New Framework for Research Universities in the 21st Century, 2016-06-29 Research universities are critical contributors to our national research enterprise. They are the principal source of a world class labor force and fundamental discoveries that enhance our lives and the lives of others around the world. These institutions help to create an educated citizenry capable of making informed and crucial choices as participants in a democratic society. However many are concerned that the unintended cumulative effect of federal regulations undercuts the productivity of the research enterprise and diminishes the return on the federal investment in research. *Optimizing the Nation's Investment in Academic Research* reviews the regulatory framework as it currently exists, considers specific regulations that have placed undue and often unanticipated burdens on the research enterprise and reassesses the process by which these regulations are created, reviewed and retired. This review is critical to strengthen the partnership between the federal government and research institutions to maximize the creation of new knowledge and products to provide for the effective training and education of the next generation of scholars and workers and to optimize the return on the federal investment in research for the benefit of the American people. *Pharmaceutical Industry and Public Policy in Post-reform India* Reji K. Joseph, 2015-07-24 This book examines the impact of economic reforms in India on the pharmaceutical industry and access to medicines. It also analyses the public health financing system in India driven largely by out of pocket expenditure about 60 per cent and characterised by very high share of medicines in total health expenditure. A masterful insight into a topical area, the work will be indispensable to those working on pharmaceutical industry and public policy. It will be of interest to researchers, scholars, students and policy makers of economics, industrial policy, public policy, intellectual property rights and health financing. *Legislative Calendar* United States. Holmes, 2015-03-09 This volume contains field guides to the 2015 GSA Southeastern Section Meeting's field trips. Amid the biggest economic transformation in a century, the challenge of our time is to make sure that all Americans benefit from the wave of digital revolutions around the world that have permeated and upended modern life. Yet today's economic arguments seem stuck. We need a new vision of a hopeful future and a new action agenda. So many Americans are uncertain about the future.

How can there be so many paths to opportunity with so few people traveling them As a nation we have to understand what is required to help Americans succeed now and how to prepare our country for what comes next We have been here before A hundred years ago America experienced the greatest economic transformation and technological revolution in its history The transformation of the past twenty years as the world has moved through the information era into the digital age has turned our life and work upside down once again It is a time of tremendous change but also of tremendous possibility Rework America is a group of American leaders who know from experience the challenges we face and the potential solutions In America s Moment they suggest a practical agenda for an exciting future It is illustrated by people who are already showing the way and includes actions Americans can take today in their own communities preparing people to succeed using the reach of the Internet and data to innovate jobs and to reach new markets all over the world using technology to match employers and workers and transitioning to a no collar working world neither blue collar nor white collar Set against the history of how Americans succeeded once before in remaking their country America s Moment is about the future It describes how the same forces of change technology and a networked world can become tools that can open opportunity to everyone

Journal of Scientific and Industrial Research ,2015 *Beyond Technonationalism* Kathryn C. Ibata-Arens,2019-04-16 The biomedical industry which includes biopharmaceuticals genomics and stem cell therapies and medical devices is among the fastest growing worldwide While it has been an economic development target of many national governments Asia is currently on track to reach the epicenter of this growth What accounts for the rapid and sustained economic growth of biomedicals in Asia To answer this question Kathryn Ibata Arens integrates global and national data with original fieldwork to present a conceptual framework that considers how national governments have managed key factors like innovative capacity government policy and firm level strategies Taking China India Japan and Singapore in turn she

compares each country's underlying competitive advantages. What emerges is an argument that countries pursuing networked technonationalism (NTN) effectively upgrade their capacity for innovation and encourage entrepreneurial activity in targeted industries. In contrast to countries that engage in classic technonationalism like Japan's developmental state approach, networked technonationalists are global minded to outside markets while remaining nationalistic within the domestic economy. By bringing together aggregate data at the global and national level with original fieldwork and drawing on rich cases, Ibatá Arens telegraphs implications for innovation policy and entrepreneurship strategy in Asia and beyond.
