Description :

Jay Maisel, hailed as one of the most brilliant, gifted photographers of all time, is much more than that. He is a mentor, teacher, and trailblazer to many photographers, and a hero to those who feel Jay's teaching has changed the way they see and create their own photography. He is a living legend whose work is studied around the world, and whose teaching style and presentation garner standing ovations and critical acclaim every time he takes the stage. Now, for the first time ever, Jay puts his amazing insights and learning moments from a lifetime behind the lens into a book that communicates the three most important aspects of street photography: light, gesture, and color. Each page unveils something new and challenges you to rethink everything you know about the bigger picture of photography. This isn't a book about f-stops or ISOs. It's about seeing. It's about being surrounded by the ordinary and learning how to find the extraordinary. It's about training your mind, and your eyes, to see and capture the world in a way that delights, engages, and captivates
