Operations Research Michael W. Carter,Camille C. Price,2017-12-19 Students with diverse backgrounds will face a multitude of decisions in a variety of engineering scientific industrial and financial settings They will need to know how to identify problems that the methods of operations research OR can solve how to structure the problems into standard mathematical models and finally how to apply or develop computational tools to solve the problems Perfect for any one semester course in OR Operations Research A Practical Introduction answers all of these needs In addition to providing a practical introduction and guide to using OR techniques it includes a timely examination of innovative methods and practical issues related to the development and use of computer implementations It provides a sound introduction to the mathematical models relevant to OR and illustrates the effective use of OR techniques with examples drawn from industrial computing engineering and business applications Many students will take only one course in the techniques of Operations Research Operations Research A Practical Introduction offers them the greatest benefit from that course through a broad survey of the techniques and tools available for quantitative decision making It will also encourage other students to pursue more advanced studies and provides you a concise well structured vehicle for delivering the best possible overview of the discipline **Linear Programming** Robert J Vanderbei,2013-07-16 This Fourth Edition introduces the latest theory and applications in optimization It emphasizes constrained optimization beginning with a substantial treatment of linear programming and then proceeding to convex analysis network flows integer programming quadratic programming and convex optimization Readers will discover a host of practical business applications as well as non business applications Topics are clearly developed with many numerical examples worked out in detail Specific examples and concrete algorithms precede more abstract topics With its focus on solving practical problems the book features free C programs to implement the major algorithms covered including the two phase simplex method primal dual simplex method path following interior point method and homogeneous self dual methods In addition the author provides online JAVA applets that illustrate various pivot rules and variants of the simplex method both for linear programming and for network flows These C programs and JAVA tools can be found on the book s website The website also includes new online instructional tools and exercises

Modern Numerical Nonlinear Optimization Neculai Andrei,2022-10-18 This book includes a thorough theoretical and computational analysis of unconstrained and constrained optimization algorithms and combines and integrates the most recent techniques and advanced computational linear algebra methods Nonlinear optimization methods and techniques have reached their maturity and an abundance of optimization algorithms are available for which both the convergence properties and the numerical performances are known This clear friendly and rigorous exposition discusses the theory behind the nonlinear optimization algorithms for understanding their properties and their convergence enabling the reader to prove the convergence of his her own algorithms It covers cases and computational performances of the most known modern nonlinear

optimization algorithms that solve collections of unconstrained and constrained optimization test problems with different structures complexities as well as those with large scale real applications The book is addressed to all those interested in developing and using new advanced techniques for solving large scale unconstrained or constrained complex optimization problems Mathematical programming researchers theoreticians and practitioners in operations research practitioners in engineering and industry researchers as well as graduate students in mathematics Ph D and master in mathematical programming will find plenty of recent information and practical approaches for solving real large scale optimization problems and applications **Catalog of Copyright Entries.
