one convenient source comments published in periodicals about 325 automobile models manufactured since 1987 on a model
by model basis These periodicals range from general interest to specialized sources as well as repair manuals and other
publications related to the individual models **Semiconductor Design and Implementation Issues in Integrated**
Vehicle Electronics John H. Hall, 2005 This major research study provides a fresh critical look at the way automobile
electronics are and should be built Written by Silicon Valley pioneer John Hall this book is based on his nearly 40 years of
experience in developing and producing semiconductors for the automobile industry and other customers Highly readable
and comprehensible for even beginning students of electronics and semiconductor design this volume provides an in depth
explanation of the factors to be considered when building vehicle systems Starting with a concise history of vehicle
electronics Hall walks the reader through the environmental conditions faced by these systems and the variety of failure
mechanisms that can occur Basic and advanced semiconductor issues raised by vehicle implementation are then discussed in
detail A wide range of issues confronting designers from over marketing of risky features to time and cost constraints are
explained Complex electronic modules from many different manufacturers are examined and discussed as real world case
studies of good and bad design techniques Hall concludes by providing design recommendations that will allow vehicle
electronics system developers to build much tougher devices at little or no incremental production cost This book is the first
major work to focus on key issues emerging as major causes of safety and performance problems Vehicle makers increasingly
seek market advantages by providing ever more capable electronics in their products While these features add much value to
vehicles they fail in ways that are beyond the experience and comprehension of most technicians and accident investigators
By combining decades of design experience and innovation with extensive research Hall has produced unique insights and
explanations so engineers can prevent most or perhaps all of these problems John Hall is one of Silicon Valley s most prolific
independent pioneers and inventors He founded Union Carbide s semi conductor operation in 1962 He is a founder of
Interstil and Micro Power Systems He is the inventor of the first electronic watch first LCD digital watch first CMOS liquid
