

3. Marking points

3.1 Marking of lists

This applies to questions requiring a set number of responses, but for which students have provided extra responses. The general principle to be followed in such a situation is that 'right + wrong = wrong'.

Each error / contradiction negates each correct response. So, if the number of error / contradictions equals or exceeds the number of marks available for the question, no marks can be awarded.

However, responses considered to be neutral (indicated as * in example 1) are not penalised.

Example 1: What is the pH of an acidic solution?

[1 mark]

Student	Response	Marks awarded
1	green, 5	0
2	red*, 5	1
3	red*, 8	0

Example 2: Name two planets in the solar system.

[2 marks]

Student	Response	Marks awarded
1	Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, Neptune	0

3.2 Marking of extended responses (essays)

For questions requiring an extended response, the whole response of a candidate is marked. The whole response is given a mark according to the quality of the response. The mark is awarded on the basis of the quality of the response, not on the basis of the number of points.

3.3 Marking procedures for calculations

Marking should be awarded for each stage of the calculation completed correctly. An examiner can determine where the working has been done. However, the given final answer is marked separately. Different marking schemes.

3.4 Interpretation of 0

Answers using the word '0' should be given credit only if it is clear that the '0' refers to the correct answer.
