Language Education And Discourse Functional Approaches:

Language, Education and Discourse Joseph Foley, 2005-12-05 This collection of essays by leading functional linguists presents the latest perspectives on language and discourse in educational settings The book questions the idea of discourse to reveal that the social processes of learning are imbued with the ideologies of the society and education system within which learning takes place The contributors take into account the historical and cross cultural perspectives of both classroom practices and the student's own awareness of the ideological meanings of language activities Language Education and Discourse is divided into two sections Part one covers early childhood and the growing development of a language system from the basic semiotic system of the infant This is followed by an analysis of the beginnings of literacy in kindergarten the introduction to writing in primary school and the ideological content of reading material Part two furthers this analysis by looking at discourse in secondary and tertiary education The contributors pose questions about the role and importance of teaching grammar in the school system and finally examine how to refine the discourse of education This book will be useful to academics interested in the latest functional perspectives on language as it is used in education **Testing the**

Untestable in Language Education Amos Paran, Lies Sercu, 2010 The testing and assessment of language competence continues to be a much debated issue in foreign language teaching and research This book is the first one to address the testing of four important dimensions of foreign language education which have been left largely unconsidered learner autonomy intercultural competence literature and literary competence and the integration of content and language learning Each area is considered through a theoretical framework followed by two empirical studies raising questions of importance to all language teachers How can one test literary competence Can intercultural competence be measured What about the integrated assessment of content and language in CLIL and teaching Is progress in autonomous learning skill gaugeable The book constitutes essential reading for anyone interested in the testing and assessment of seemingly largely untestable aspects of foreign language competence The title of this book is well chosen Despite the apparent oxymoron this collection of papers succeeds in addressing important issues of educational policy and theory with the precision born of empirical work combined with discussion of principles This book will open new options for testers for teachers and for those who make policy decisions Michael Byram School of Education University of Durham UK **Language Learning in New English**

Contexts Rita Elaine Silver, Lubna Alsagoff, Christine C M Goh, 2009-03-08 This edited volume is dedicated to the exploration of English language acquisition and development outside of the largely monolingual environments of North America the United Kingdom and Australia Specifically the studies investigate different facets of English language learning in Singapore and uses this experience to forge connections with other New English contexts Using empirical data drawn from a range of language classrooms the contributors emphasise the place of education within a global framework of English language learning In so doing they examine economic social and political factors influencing language education and present a

refreshingly global perspective on English language acquisition This comprehensive examination of language learning in New English contexts will be of interest to researchers in applied linguistics and world Englishes *Functional Approaches to Language* Shannon Bischoff, Carmen Jany, 2013-10-29 Functionalism as characterized by Allen 2007 254 holds that linguistic structures can only be understood and explained with reference to the semantic and communicative functions of language whose primary function is to be a vehicle for social interaction among human beings Since the 1970s inspired by the work of Jespersen Bolinger Dik Halliday and Chafe functionalism has been attached to a variety of movements and models making major contributions to linguistic theory and to various subfields within linguistics such as syntax discourse language acquisition cognitive linguistics typology and documentary linguistics Further functional approaches have had a major impact outside linguistics in fields such as psychology and education both in terms of theory and application The main goal of functionalist approaches is to clarify the dynamic relationship between form and function Thompson 2003 53 Functionalist perspectives have gained more ground over the past decades with more linguists resorting to functional explanations to account for linguistic structure The authors in this volume present the current state of functional approaches to linguistic inquiry expanding our knowledge of language and linguistics *What is Next in Educational Research?* Si Fan, Jill Fielding-Wells, 2016-07-08 What is Next in Educational Research enables the reader to peek into research at the forefront of a diverse range of education fields as it is being conducted by beginning researchers The book illustrates the extensive range of research being undertaken in education through a broad range of issues topics and methodologies that will underpin and provoke research well into the future The five sections address a range of topics including issues in design and methodology social integration language education leadership and issues in contemporary education Each chapter makes a valuable contribution to existing educational research and is a testament to the potential of these researchers to lead innovative educational research projects Both higher degree by research students and their supervisors will find this book particularly useful and interesting as it provides examples of quality research higher degree writing illustrates a variety of contemporary methodologies and supports the early publication of student work *Research Handbook on Curriculum and Education* Elizabeth Rata, 2024-04-12 This incisive Handbook brings together a wealth of innovative research from international curriculum and education experts to ask the question what knowledge should be taught in school how should it be taught and for what purpose **Designing Learning with Embodied Teaching** Fei Victor Lim, 2020-08-27 Teaching and learning involve more than just language The teachers use of gestures the classroom spaces they occupy and the movements they make as well as the tools they use work together with language as a multimodal ensemble of meanings Embodied teaching is about applying the understandings from multimodal communication to the classroom It is about helping teachers recognise that the moves they make and the tools they use in the classroom are part of their pedagogy and contribute to the design of the students learning experience In response to the changing profile and needs of learners in this digital age pedagogic shifts

are required A shift is the evolving role of teachers from authority of knowledge to designers of learning This book discusses how using examples drawn from case studies teachers can use corporeal resources and digital tools to design learning experiences for their students It advances the argument that the study of the teachers use of language gestures positioning and movement in the classroom from a multimodal perspective can be productive This book is intended for educational researchers and teacher practitioners as well as curriculum specialists and policy makers The central proposition is that as teachers develop a semiotic awareness of how their use of various meaning making resources express their unique pedagogy they can use these multimodal resources aptly and fluently to design meaningful learning experiences This book also presents a case for further research in educational semiotics to understand the embodied ways of meaning making in the pedagogic context

Writing and Language Learning Rosa M. Manchón, 2020-11-15 The current volume aspires to add to previous research on the connection between writing and language learning from a dual perspective It seeks to reflect current progress in the domain as well as to foster future developments in theory and research The theoretical postulations contained in Part I identify and expand in novel ways the diverse lenses through which the varied multi faceted dimensions of the connection between writing and language learning can be explored The methodological reflections put forward in Part III signal theoretically grounded and pedagogically relevant paths along which future empirical work can grow The empirical studies reported in Part II illuminate the myriad of individual educational and task related variables that may mediate short term and long term language learning outcomes These studies examine diverse forms of writing performed in varied environments including pen and paper and digital writing conditions writing individually and or collaboratively and instructional settings academic settings including secondary school and college level institutions as well as out of school contexts
