Economics of Happiness: Towards a General Theory of Well-being Paul T. P Wong,Lok Sang Ho,Richard Gregory Cowden,Claude-Hélène Mayer,Fan Yang,2023-10-24 New developments in positive psychology have evolved into the 2nd and 3rd waves going beyond the individual and positive focus towards complex systems multi cultures and the existential positive psychology of transcending suffering The present project aims at developing a general theory of well being that integrates all the above changes as the new frontier of positive psychology At a time when humanity is threatened by all kinds of existential crises from climate change to nuclear war from ideological polarization to a widening income gap we need to develop a big picture theoretical framework showing that happiness is not just for those living in peace and prosperity but also for those struggling in dire poverty and war ravaged countries like Ukraine not just for the self but also for others not just for the present but also for future generations This broader approach towards wellbeing opens up new vistas for research and interventions **Research on Emotion and Learning: Contributions from Latin America** Camilo

groups tend to work in isolation or in local sporadic collaboration and results are often published in journals that are not indexed in major citation databases e g SCOPUS or Web of Science Ultimately part of Latin American high quality research seems to remain hidden from the rest of the world Over the last decades an important number of Latin American scientists have developed fruitful research agendas on questions on learning and emotion focusing on basic and or translational research with humans and other animal models and implementing diverse methodologies Notwithstanding the important contributions of these research programs Latin American research on emotion and learning has followed the overall trend of other research fields throughout the region namely remaining partially hidden from the large scientific community of the world This Research Topic aimed to engage researchers from Latin America to share their empirical and conceptual work on learning and emotion Ultimately this effort was expected to strengthen and integrate our regional community of experts enhance global networking and establish new challenges and developments for future investigation
