Beebe,2017-08-20 This highly comprehensive handbook provides a substantial advance in the computation of elementary and special functions of mathematics extending the function coverage of major programming languages well beyond their international standards including full support for decimal floating point arithmetic Written with clarity and focusing on the C language the work pays extensive attention to little understood aspects of floating point and integer arithmetic and to software portability as well as to important historical architectures It extends support to a future 256 bit floating point format offering 70 decimal digits of precision Select Topics and Features references an exceptionally useful author maintained MathCW website containing source code for the book s software compiled libraries for numerous systems pre built C compilers and other related materials offers a unique approach to covering mathematical function computation using decimal arithmetic provides extremely versatile appendices for interfaces to numerous other languages Ada C C Fortran Java and Pascal presupposes only basic familiarity with computer programming in a common language as well as early level algebra supplies a library that readily adapts for existing scripting languages with minimal effort supports both binary and decimal arithmetic in up to 10 different floating point formats covers a significant portion with highly accurate implementations of the U S National Institute of Standards and Technology s 10 year project to codify mathematical functions This highly practical text reference is an invaluable tool for advanced undergraduates recording many lessons of the intermingled history of computer hardware and software numerical algorithms and mathematics In addition professional numerical analysts and others will find the handbook of real interest and utility because it builds on research by the mathematical software community over the last four decades *ACM SIGPLAN Notices* ,2006 *Belitung* Natali Pearson,2022-11-30 In 1998 the Belitung a ninth century western Indian Ocean style vessel was discovered in Indonesian waters Onboard was a full cargo load likely intended for the Middle Eastern market of over 60 000 Chinese Tang dynasty ceramics gold and other precious objects It is one of the most significant shipwreck discoveries of recent times revealing the global scale of ancient commercial endeavors and the centrality of the ocean within the Silk Road story But this shipwreck also has a modern tale to tell of how nation states appropriate the remnants of the

past for their own purposes and of the international debates about who owns and is responsible for shared heritage The commercial salvage of objects from the Belitung and their subsequent sale to Singapore contravened the principles of the 2001 UNESCO Convention on the Protection of the Underwater Cultural Heritage and prompted international condemnation The resulting controversy continues to reverberate in academic and curatorial circles Major museums refused to host international traveling exhibitions of the collection and some archaeologists announced they would rather see the objects thrown back in the sea than ever go on display Shipwrecks are anchored in the public imagination their stories of treasure and tragedy told in museums cinema and song At the same time they are sites of scholarly inquiry a means by which maritime archaeologists interrogate the past through its material remains Every shipwreck is an accidental time capsule replete with the sunken stories of those on board of the personal and commercial objects that went down with the vessel and of an unfinished journey In this moving and thought provoking reflection of underwater cultural heritage management Natali Pearson reveals valuable new information about the Belitung salvage obtained firsthand from the salvagers and the intricacies in the many conflicts and relationships that developed In tracing the Belitung s lives and afterlives this book shifts our thinking about shipwrecks beyond popular tropes of romance pirates and treasure and toward an understanding of how the relationships between sites objects and people shape the stories we tell of the past in the present *Forthcoming Books*
