God and the Science of Spirit William J. Berndt, 2014-07-08 We go through our lives day to day growing older with each passing sunset and for most of us that s all it is passing through the commonplace world around us But occasionally and very rarely we unwittingly peer into a hole in space and time glimpsing dimensions through a tear in the fabric of the universe The following stories give us a brief look at people and places that have been thrust into such unimagined dimensions Retired NYPD officer and charter boat captain encounters a demonic vengeance torn from the very depths of the ocean or perhaps out of a hole in fabric of the universe Where is God What would he be like if he showed up today A degenerate gambler gets the answers on the Atlantic City boardwalk and its nothing like he would ever imagine What if one had been given the power to stop time And how would the world be affected if that individual turned out to be despicable Find the answer when you peek through a tear in the fabric of the universe Crooked lawmen murder and decades old revenge in 1970 s Louisiana ripped through a tear in the fabric of the universe A Nazi SS killer squad in occupied France encounters an ancient horrific secret even more deadly than they ever could be Such things occur when the veil of the universe is torn ever so briefly This dramatized story is based on supposedly true events related to me by a resident of Shoreham Long Island NY It s a tale of obsessions and supernatural beings thousands of years old in our midst today From a tear in the fabric of the universe comes an implacable destiny that follows a modern submariner to an unwavering fate Does love transcend space and time Can it follow us to unimagined dimensions Find out the answers in this tale of supernatural passion in 1965 war torn Saigon When the universe erupts in catastrophe the only thing we may salvage is our basic instincts and perhaps it may be all we need to survive glimpses into such tears in the fabric of the universe **MegaMeaning** William J. Berndt, 2014-10-28 Modern science now stretches into the realm of the invisible Are scientists now unwittingly knocking on the doors of heaven How

remarkable would it be if you could look at the behavior of spirit beings as described in the Bible and see the same types of behaviors in the subatomic particles of science The resemblance is uncanny and this is where the fun really begins Is it possible that this physical universe is merely an extension of the real world of God Is it possible that a mega plan exists that is a work of genius proportion Could the blueprint of eternal purpose be surrounding you every day God The Science of Spirit is volume two in MegaMeaning a series on the meaning of life
