The \$50 Billion Leak: Stopping Energy Waste Through Intelligent Building Systems Charles Nehme, Welcome to the hidden crisis costing our global economy billions of dollars every single year the silent insidious drain of energy waste from the built environment For decades we have designed constructed and operated buildings that function like sieves hemorrhaging power through outdated mechanical systems uncontrolled air flows and analog management practices We treat buildings as static consumers relying on opaque monthly utility bills that offer no real insight into where when or why energy is truly being wasted This is the 50 Billion Leak and it persists because until now the technology required to plug it has been fragmented proprietary and complex This book is a direct response to that challenge Drawing on over 30 years of global experience in high performance MEP consulting my goal is to provide a comprehensive actionable roadmap for transitioning from an energy wasting legacy facility to a high performing intelligent asset We will bridge the gap between the mechanical engineer's equations and the facility owner's bottom line We will move past superficial efficiency measures to harness the true power of Intelligent Building Systems IBS IoT connectivity and Artificial Intelligence AI These technologies are not merely costly upgrades they are the essential tools that transform energy data into economic value environmental responsibility and superior occupant comfort It is time to stop flying blind It is time to make the invisible visible It is time to plug the leak and secure a sustainable profitable future for the buildings that define our world

Undeniable

Douglas Axe, 2016-07-12 In this engaging book Axe uses common science to consider the biggest mystery To what or to whom do we owe our existence Dean Koontz A World Magazine Best Book of the Year Throughout his distinguished and unconventional career engineer turned molecular biologist Douglas Axe has been asking the questions that much of the scientific community would rather silence Now he presents his conclusions in this brave and pioneering book Axe argues that the key to understanding our origin is the design intuition the innate belief held by all humans that tasks we would need knowledge to accomplish can only be accomplished by someone who has that knowledge For the ingenious task of inventing life this knower can only be God Starting with the hallowed halls of academic science Axe dismantles the widespread belief that Darwin's theory of evolution is indisputably true showing instead that a gaping hole has been at its center from the beginning He then explains in plain English the science that proves our design intuition scientifically valid Lastly he uses everyday experience to empower ordinary people to defend their design intuition giving them the confidence and courage to explain why it has to be true and the vision to imagine what biology will become when people stand up for this truth Armed with that confidence readers will affirm what once seemed obvious to all of us that living creatures from single celled cyanobacteria to orca whales and human beings are brilliantly conceived utterly beyond the reach of accident Our intuition was right all along Douglas Axe's Undeniable is bold insightful and world changing It's also a joy to read I recommend it highly Phillip E Johnson Professor Emeritus of Law at U C Berkeley and author of Darwin on Trial An important addition to the debate on the origins of life It provides a middle way between religious and scientific explanations of how life began A must read for everyone who is interested in the origins of our universe The Washington Book Review *My Odyssey* Jack McLaren, 1923 Creative Experiences for Young Children Mimi Brodsky Chenfeld, 1995 Designed for early childhood courses that focus on an integrated curriculum play and the language arts this popular child centered text emphasizes multiculturalism and home school communication and successfully integrates teaching ideas and techniques in a variety of subject areas Incorporating philosophies and suggestions from outstanding educators Chenfeld continually focuses on the importance of fun play and creativity to help young children develop self esteem respect for others and concern for the environment community and social problems Features Categorizes major themes important to children such as family friends where we live clothes and food Each theme focuses on basic curriculum areas such as Talk Time Visual Arts Time Movement and Play Time Field Trips Classroom Visitors and It All Comes Together Places language at the core of learning and underscores the practices and ideas of whole language Recognizes the importance of play and movement as essential normal ways children learn Discusses community and parental involvement as a key element in early childhood development Highlights the contributions by children and classroom teach Reflections on Europe Hans-Åke Persson, Bo Stråth, 2007 When Dutch and subsequently French voters rejected the Draft Treaty for a Constitution for Europe in Spring 2005 many voices called for a pause for reflection This book is in part a result of that moment of reflection We wanted to contribute to

the debate about Europe but crucially we sought to do so by taking a step back from the problem formation and agenda setting of Brussels For the authors of this volume one key to establishing critical distance has been the reappraisal of the historical perspective Another has been the problematisation of Europe as a space as opposed to looking for a definition of borders The authors also seek critical distance through a focus on the tension between Europe as a culture as a polity and as an economy These tensions have often been neglected or even ignored and the relationships have been seen as more or less synonymous and harmonious The aim of this volume then is two fold It wants developing a critical distance to the present Europe to contribute to the vivid academic research and debate on Europe which too often either develops distance without commenting on the present state of affairs or comments on the present without critical distance Museums Journal Elijah Howarth, F.
