JUMP Math. Teacher's Manual for the Fractions Unit John Mighton, 2004 **The Imagination in Education** Sean Blenkinsop, 2009 This collection of essays from scholars in eleven countries centres upon the theory and practice of the use of imagination in education By bringing together studies covering a wide range of subject matter we trust that the reader will have the opportunity to appreciate both the diversity within the field and the significance of the topics discussed We hope too that readers will find connections to their own areas of study The 13 essays present distinct yet converging points of view whether it be a discussion of the imagination as a virtue the use of imagination as a means to improve aboriginal education in Northern Canada or the description of a museum in Brazil in which the imagination of the child is central to the project Separately each of the papers identifies and explores a distinct aspect of Imaginative Education together they begin to define the breadth and richness of the field These essays have been selected from papers presented over a period of several years to research symposiums in imagination and education held every summer in Vancouver Canada under the auspices of the Imaginative Education Research Group in the Faculty of Education at Simon Fraser University The End of Ignorance John Mighton, 2011-06-01 A revolutionary call for a new understanding of how people learn The End of Ignorance conceives of a world in which no child is left behind a world based on the assumption that each child has the potential to be successful in every subject John Mighton argues that by recognizing the barriers that we have experienced in our own educational development by identifying the moment that we became disenchanted with a certain subject and forever closed ourselves off to it we will be able to eliminate these same barriers from standing in the way of our children A passionate examination of our present education system The End of Ignorance shows how we all can work together to reinvent the way that we are taught **Fractions Unit** John Mighton, 2004 Grade level 3 4 5 6 p e i t **Everyday Mathematics: Math masters**, 2002
