Coplanar points

Some expressions commonly used to describe relationships between points, lines, and planes follow. In these expressions, *intersection* means "points" or "sets." The intersection of two figures is the set of points that are in both figures. Dashed in the diagrams indicate parts hidden from view in figures in space.

In this book, whenever we refer, for example, to "two points" or "three lines," we will mean *different* points or lines (or other geometric figures).
