Bain, 2019-05-13 Unleash powerful teaching and the science of learning in your classroom. *Powerful Teaching: Unleash the Science of Learning* empowers educators to harness rigorous research on how students learn and unleash it in their classrooms. In this book, cognitive scientist Pooja K. Agarwal, Ph.D., and veteran K-12 teacher Patrice M. Bain, Ed.S., decipher cognitive science research and illustrate ways to successfully apply the science of learning in classroom settings. This practical resource is filled with evidence-based strategies that are easily implemented in less than a minute without additional prepping, grading, or funding. Research demonstrates that these powerful strategies raise student achievement by a letter grade or more, boost learning for diverse students, grade levels, and subject areas, and enhance students' higher-order learning and transfer of knowledge beyond the classroom. Drawing on a fifteen-year scientist-teacher collaboration, more than 100 years of research on learning, and rich experiences from educators in K-12 and higher education, the authors present highly accessible, step-by-step guidance on how to transform teaching with four essential strategies: Retrieval practice, spacing, interleaving, and feedback-driven metacognition. With *Powerful Teaching*, you will develop a deep understanding of powerful teaching strategies based on the science of learning. Gain insight from real-world examples of how evidence-based strategies are being implemented in a variety of academic settings. Think critically about your current teaching practices from a research-based perspective. Develop tools to share the science of learning with students and parents, ensuring success inside and outside the classroom. *Powerful Teaching: Unleash the Science of Learning* is an indispensable resource for educators who want to take their instruction to the next level. Equipped with scientific knowledge and evidence-based tools, turn your teaching into powerful teaching and unleash student learning in your classroom.

Memory at Work in the Classroom: Strategies to Help Underachieving Students Francis Bailey, Ken Pransky, 2014-03-04 Why do some students struggle to understand and retain information while other students don't? The answer may well lie in the memory system, which is the root of all learning. In *Memory at Work in the Classroom*, Francis Bailey and Ken Pransky expertly guide you through the aspects of human memory most relevant to classroom teachers. Real classroom examples help to deepen your understanding of how memory systems play a central role in the learning process, as

well as how culture plays a sometimes surprising role in memory formation and use The memory systems covered in the book are Working Memory the gateway to learning Executive Function the cognitive skills children need to independently orchestrate their memory systems in service to learning Semantic Memory the storehouse of a person's knowledge of the world including academic concepts and the part of the memory system most affected by culture Episodic Memory rich multisensory personal memories of specific events Autobiographical Memory one's sense of self tied directly to student motivation Although the techniques described apply to all students the authors concentrate on explaining the source of struggling students' academic challenges and provide effective strategies for helping students become better learners Whether you're a new or a veteran teacher this book will offer fresh insights into your students' learning difficulties and move you to explore classroom practices that align with the functioning of memory and the ways students learn Lie Algebras, Vertex Operator Algebras and Their Applications Yi-Zhi Huang, Kailash C. Misra, 2007 The articles in this book are based on talks given at the international conference Lie algebras vertex operator algebras and their applications The focus of the papers is mainly on Lie algebras quantum groups vertex operator algebras and their applications to number theory combinatorics and conformal field theory **First Grade Fun, Fitness & Learning, Grade 1** Maiden, 2012-01-03 Incorporate activities that energize and engage students in grade 1 using Fun Fitness and Learning This 64 page book includes 55 large group activities in which students use locomotor or nonlocomotor skills while activating their thinking skills To reinforce what has been learned during the group activities students complete half page exercises for individualized skill practice Lessons in this dynamic resource cover topics such as phonemic awareness weather writing mechanics grammar numbers geometry and measurement plants and animals maps citizenship and fitness The book supports NCTM and NCTE standards Catalog of Copyright Entries.
