Railway Literature Association of American Railroads, 1950

British railway enthusiasm Ian Carter, 2017-10-03. Now available in paperback, this is the first academic book to study railway enthusiasts in Britain. Far from a trivial topic, the post-war train spotting craze swept most boys and some girls into a passion for railways, and for many ignited a lifetime's interest. *British railway enthusiasm* traces this post-war cohort and those which followed as they invigorated different sectors in the world of railway enthusiasm: train spotting, railway modelling, collecting railway relics, and then in response to the demise of main line steam traction, Britain's now huge preserved railway industry. Today this industry finds itself riven by tensions between preserving a loved past which ever fewer people can remember and earning money from tourist visitors. The widespread and enduring significance of railway enthusiasm will ensure that this groundbreaking text remains a key work in transport studies and will appeal to enthusiasts as much as to students and scholars of transport and cultural history.
