Modelling the F-4 Phantom II Geoff Coughlin, Neil Ashby, 2012-05-20 The Phabulous Phantom first took to the air on 27 May 1958 and has been in service around the world for many decades The United States the United Kingdom Australia Egypt Germany Greece Iran Israel Japan South Korea Spain and Turkey have all operated this powerful aircraft The Phantom starred in both the Vietnam War and Operation Desert Storm and in its service career has flown every traditional military mission With many F 4 variants in service from FG 1s to Wild Weasels and some 25 scale model kits currently available the possibilities for modelling this subject are endless One of the few guides available on this model this book provides an in depth and step by step approach to modelling this plane across a variety of scales types and national schemes *Coming Down the Seine* Robert Gibbings, 2003 One of the Europe s most celebrated rivers the Seine stretches from the fertile plains of Burgundy to the English Channel at Le Havre Starting at its source near Dijon writer and engraver Robert Gibbings follows the river s 400 mile course as it develops from a tranquil stream into the mighty waterway that links Rouen to the sea The journey takes different forms on foot in a tiny boat hardly more than a coracle on a barge and on a boat used for transporting books Throughout this leisurely voyage during one summer Gibbings records his impressions visual and verbal of places and people as well as explaining how the river has played a vital role in French history In part an evocation of the Seine s changing landscapes and rural beauty this is also an account of towns and cities Troyes Rouen Paris and their relationship with the river Looking at writers and painters as well as historic figures who have left their mark on the Seine Gibbings presents an affectionate picture of this great river and the people who live and work on its banks Discussing the vineyards of Champagne the paintings of Sisley and Utrillo the rituals of Parisian cafe life the author conveys a **The British National Bibliography** Arthur James Wells, 2006 *Modelling the F/A-18 Hornet* Geoff Coughlin, 2012-05-20 The McDonnell Douglas F A 18 Hornet is probably the world s most advanced air superiority fighter attack aircraft and is often seen thrilling air show crowds around the world It is currently in service with the US Navy the US Marine Corps the Spanish

Australian Swiss and Canadian air forces This is a detailed guide to modelling the Hornet in 1 48th and 1 32nd scales covering a variety of colour schemes The step by step modelling projects include a Gunslingers F A 18C USN Hornet from Operation DESERT FOX an F A 18D Hornet from the Royal Malaysian Air Force a Navy Black Aces F A 18F Super Hornet and an F A 18A Top Gun school Hornet *RAF Fighters Before the Storm* Martin Derry,Neil Robinson,2024-07-30 When the First World War ended the then recently established Royal Air Force was awash with aircraft of all descriptions More surprising perhaps was the fact that despite an ongoing cull of obsolescing types on the last day of 1919 the RAF still possessed 9 122 non obsolete aircraft with a further 1 100 more assigned to the Fleet Air Arm while the famous SE 5A and Sopwith Camel had by this time largely been consigned to history the RAF possessed no less than 1 860 Sopwith Snipes which from 1920 would become the RAF s standard single seat fighter for years to come Other core types on charge on 31 December 1919 included some 1 650 Bristol F 2B fighters and 1 250 de Havilland DH 9As which together with the Snipe accounted for over fifty per cent of the RAF s inventory at that time Avro 504 training aircraft accounted for a further 2 700 airframes In this Flight Craft Special the authors provide a detailed and informative pictorial history of those scout fighter aircraft that served in an operational capacity with the RAF from January 1920 until the last day of 1939 a period in which Britain once again moved from an era of peace to war with an old enemy albeit this time Hitler s totalitarian National Socialist Germany as opposed to the Imperial Germany of old As well as covering each of the fighter types used during the inter war period and featuring most of the squadrons the photographs themselves convey the sense of the technical advances that rapidly took root within Britain s aero industries from the mid 1930s onwards moving from the brightly marked overall silver wood and linen biplanes to the dull camouflaged metal skinned monoplanes The progression of machine gun development from the Lewis and Vickers of the First World War to the later Browning is covered spanning the days of the biplanes two fixed synchronised Lewis or Vickers 303 inch machine guns mounted in the forward fuselage to eight wing mounted 303 inch Browning machine guns in the new monoplane fighters There is also a small but fascinating section on the monoplane also runs the monoplane fighters that were designed and had prototypes built but failed to reach the finishing post **Focke-Wulf Fw 190A to G** Martin Derry,Neil Robinson,2024-07-25 The Focke Wulf Fw 190 was a versatile and formidable Luftwaffe fighter dominating multiple WWII fronts The Focke Wulf Fw 190 was arguably the Luftwaffe s most outstanding piston engine fighter of the Second World War virtually dominating the skies over Europe for more than a year after its initial introduction into service in the summer of 1941 Continual development and improvements then kept it at the forefront of operations in the theaters of Northern Europe the Mediterranean and the Eastern Front for the remainder of the war while maintaining a competitive edge over many other types as well as gaining and retaining the grudging respect of those Allied pilots who faced it in combat Despite being designed as a fighter the BMW 801 powered Fw 190 sub types performed practically every role possible for a single engine single seat aircraft including offensive and defensive day fighter

day and night fighter bomber ground attack reconnaissance platform night fighter and trainer The Fw 190A also served in the Hungarian Air Force during the later stages of the Second World War the Turkish Air Force from mid 1942 to 1948 and post war with the French where the SNCAC aircraft company rebuilt over fifty Fw 190A 5 A 6s under the designation NC 900 for service with the new Arm e de l Air Despite having standard factory applied camouflage and markings schemes many Fw 190s were also finished in a variety of on unit and seasonal and or operational theater schemes which add to the aircraft s story
