Global Transformations in the Life Sciences, 1945-1980 Patrick Manning, Mat Savelli, 2018-06-07 The second half of the twentieth century brought extraordinary transformations in knowledge and practice of the life sciences In an era of decolonization mass social welfare policies and the formation of new international institutions such as UNESCO and the WHO monumental advances were made in both theoretical and practical applications of the life sciences including the discovery of life's molecular processes and substantive improvements in global public health and medicine Combining perspectives from the history of science and world history this volume examines the impact of major world historical processes of the postwar period on the evolution of the life sciences Contributors consider the long term evolution of scientific practice research and innovation across a range of fields and subfields in the life sciences and in the context of Cold War anxieties and ambitions Together they examine how the formation of international organizations and global research programs allowed for transnational exchange and cooperation but in a period rife with competition and nationalist interests which influenced dramatic changes in the field as the postcolonial world order unfolded

The Draft, 1940-1973 George Q. Flynn, 1993 Individual liberty is ingrained in American culture Yet in contrast to this cherished ideal American men were inducted into military service under a system that flourished for more than twenty years before its rationalization was seriously questioned by more than a small minority of citizens Analyzing this paradox George Flynn provides the first comprehensive look at an institution that managed to sustain political and public favor through two wars before dying out under a barrage of protests during a third Placing the American draft within a historical context he shows how social and political considerations determined the character of conscription in the United States The draft developed as it did he argues not mainly because of military needs or

strategy but because of political decisions initiated by civilians with nonmilitary agendas Explaining why the draft remained relatively immune to political criticism prior to the Vietnam conflict Flynn chronicles the draft s military and strategic successes and failures in America s mid century wars He shows how major institutions and lobbies representing science education and various professions and religions influenced it and how ultimately and ironically the selective character of the draft eventually made the system inequitable and helped cause its downfall BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved **The Laboratory Digest** ,1960 *Publications of the State of Illinois* Illinois.
