

Cellular Respiration

How is energy transferred and transformed in living systems?

Why?

Living organisms display the property of **metabolism**, which is a general term to describe the processes carried out to acquire and use energy. We know that people need to eat, and in our foods are various kinds of nutrients that our cells use. One large group of nutrients in our foods is carbohydrates, which supply our cells with glucose ($C_6H_{12}O_6$). So the question is: How does the food we chew and swallow fuel our cells?

Model 1 - Glycolysis

1. Refer to Model 1.

a. What is represented by the hexagon?

GLUCOSE

b. How many carbon atoms (C) are in one molecule of glucose?

SIX

2. Refer to Model 1.

a. What is represented by the triangle?

PYRUVIC ACID

b. How many carbon atoms (C) are in one molecule of pyruvic acid?

THREE

3. In the process of glycolysis, what happens to glucose after it crosses the cell membrane into the cytoplasm of the cell?

GLUCOSE IS BROKEN DOWN INTO PYRUVIC ACID (2)

Modern Biology V. B. Rastogi, 1997 **Modern Thermodynamics for Chemists and Biochemists** Dennis Sherwood, Paul Dalby, 2018-05-11 Thermodynamics is fundamental to university and college curricula in chemistry physics engineering and many life sciences around the world It is also notoriously difficult for students to understand learn and apply What makes this book different and special is the clarity of the text The writing style is fluid natural and lucid and everything is explained in a logical and transparent manner Thermodynamics is a deep and important branch of science and this book does not make it easy But it does make it intelligible This book introduces a new Fourth Law of Thermodynamics based on the notion of Gibbs free energy which underpins almost every application of thermodynamics and which the authors claim is worthy of recognition as a law The last four chapters bring thermodynamics into the twenty first century dealing with bioenergetics how living systems capture and use free energy macromolecule assembly how proteins fold and macromolecular aggregation how for example virus capsids assemble This is of great current relevance to students of biochemistry biochemical engineering and pharmacy and is covered in very few other texts on thermodynamics The book also contains many novel and effective examples such as the explanation of why friction is irreversible the proof of the depression of the freezing point and the explanation of the biochemical standard state *EBOOK: Biology* Peter Raven, George Johnson, Kenneth Mason, Jonathan Losos, Susan Singer, 2013-02-16 Committed to Excellence in the Landmark Tenth Edition This edition continues the evolution of Raven Johnson s *Biology* The author team is committed to continually improving the text keeping the student and learning foremost We have integrated new pedagogical features to expand the students learning process and enhance their experience in the ebook This latest edition of the text maintains the clear accessible and engaging writing style of past editions with the solid framework of pedagogy that highlights an emphasis on evolution and scientific inquiry that have made this a leading textbook for students majoring in biology and have been enhanced in this landmark Tenth edition This emphasis on the organizing power of evolution is combined with an integration of the importance of cellular molecular biology and genomics to offer our readers a text that is student friendly and current Our author team is committed to producing the best possible text for both student and faculty The lead author Kenneth Mason University of Iowa has taught majors biology at three different major public universities for more than fifteen years Jonathan Losos Harvard University is at the cutting edge of evolutionary biology research and Susan Singer Carleton College has been involved in science education policy issues on a national level All three authors bring varied instructional and content expertise to the tenth edition of *Biology* **Biology** Gerald Audesirk, Teresa Audesirk, 1993 With the amount of information in biology growing constantly it is a challenge for readers to develop a sense of scientific literacy and to become educated consumers This volume helps readers manage a wealth of scientific information in a manner that is both meaningful and long lasting Features significant content revisions as well as new figures and photographs in every chapter Includes an entirely new

chapter on conservation biology Presents approximately 40% new photos Adds new bioethics icons to call out essays that relate to this timely topic A comprehensive reference for anyone interested in learning more about biology

In glycolysis glucose a six carbon sugar is split into two molecules of a three carbon sugar Glycolysis yields two molecules of ATP free energy containing molecule two molecules of pyruvic acid and two high energy electron carrying molecules of NADH Glycolysis can occur with or without oxygen In the presence of oxygen glycolysis is the first stage of cellular respiration Without oxygen glycolysis allows cells to make small amounts of ATP This process is called fermentation This book presents the latest research in the field
