Handbook of Assessment in Clinical Gerontology Peter A. Lichtenberg, 1999-08-18. Handbook of Assessment in Clinical Gerontology. New trends in healthcare practice and changes in healthcare organizations are causing an explosion in the field of clinical gerontology today. A variety of fields such as health rehabilitation, behavioral analysis, and neuropsychology are now applying their assessment techniques to older adults and spurring significant growth in assessment knowledge and practice in areas previously neglected by gerontologists. This groundbreaking handbook offers clinicians reliable and valid assessment tools and case examples in each chapter for assessing functional age, psychosocial health, comorbidity, pathological behavior, deficits and much more including:

- Issues in geriatric assessment
- Mental status screening tests
- Depression and anxiety disorders
- Assessment of communication disorders and aphasia
- Assessment of competency and decision making capacity
- Assessment of medication compliance
- Dementia and delirium assessment
- Behavioral health and chronic diseases
- Ethical dilemmas that arise in assessment
- Personality disorders and alcohol abuse assessment
- Sexual function and dysfunction
- Behavioral assessment
- Principles of assessment in neuropsychology

This comprehensive handbook, the first of its kind, gives clear guidelines on assessing cognitive functioning, mental health, and ability to engage in self care.

Assessing Adolescents with the MACI Joseph T.

McCann,1999-03-08 Assessing Adolescents with the MACI is an interpretive guide for using the Millon Adolescent Clinical Inventory the most widely used personality assessment test for adolescents The first book devoted exclusively to the MACI this resource will prove a helpful guide for understanding the test interpreting the results in clinical evaluation and making appropriate recommendations for treatment and care management Unlike other assessment tests developed for adults and adapted for adolescents the MACI was created to address the unique concerns pressures and situations of adolescents The MACI is also constructed using an underlying theory of personality and psychopathology The MACI is a 160 item 31 scale self report inventory that was designed to assess personality styles significant problems or concerns and clinical symptoms in adolescents Using a true false format the MACI surveys a wide range of personality characteristics and clinical symptoms that tend to be a focus in psychological evaluations of teenagers that either have or are suspected of having emotional or behavioral difficulties While multi scale personality inventories such as the MACI are useful for improving the clinician s understanding of an adolescent s personality and clinical symptoms there are other reasons for using such instruments The MACI can be used to formulate diagnostic hypotheses confirm clinical diagnoses formulate treatment plans or assist in decision making surrounding case management and disposition planning The MACI can be used as an outcome measure to evaluate changes in an adolescent s functioning as a result of treatment and intervention Of course the MACI can also be used in research studies to investigate a range of issues that pertain to adolescent psychopathology personality and treatment response Drawing on a broad range of sources including data in the MACI manual published research studies unpublished research theoretical literature and his own experience with the test Joseph McCann lays the groundwork for the basis of the test and then offers an exhaustive exploration of all facets of the test Recognizing both the strengths and weaknesses of the MACI McCann offers a balanced and comprehensive resource on this vital assessment tool This book fills an important gap in the clinical literature Joseph McCann author of this first full text on the MACI is the best known workshop presenter on the topic Assessment with the MACI will enable the student and the clinician to develop a sophisticated basis for disentangling the many variations among youngsters to assess both their assets and liabilities to determine the presence of clinical disorders and most importantly to provide a full picture that can serve as the basis for making decisions regarding each adolescent s welfare that is to be able to outline a logical course of treatment which may prove more optimally efficacious It will guide the reader to transform the raw MACI test data coordinate these data with the history of the youngster s experience as well as with observational and interview information facilitating interpretive syntheses and providing thereby a basis to help link assessment to psychotherapy This text is insightful and comprehensive a work of inestimable value to both practicing clinicians and students Theodore Millon from the Foreword **Computers in Human Behavior** ,1993 *Omega* ,2001
