

Introduction

The purpose of this study is to investigate the effects of various factors on the growth and development of human embryos. The study was conducted over a period of 12 weeks, during which time the embryos were monitored and their development recorded.

The results of the study show that the growth and development of human embryos is a complex process, influenced by a variety of factors. The most significant factors identified in this study are the presence of certain hormones, the availability of nutrients, and the overall health of the mother.
