Orr,1987 **Error Compensation for Industrial Robots** Wenhe Liao,Bo Li,Wei Tian,Pengcheng Li,2022-11-29 This book highlights the basic theories and key technologies of error compensation for industrial robots The chapters are arranged in the order of actual applications establishing the robot kinematic models conducting error analysis conducting kinematic and non kinematic calibrations and planning optimal sampling points To help readers effectively apply the technologies the book elaborates the experiments and applications in robotic drilling and milling which further verifies the effectiveness of the technologies This book presents the authors research achievements in the past decade in improving robot accuracy It is straightforwardly applicable for technical personnel in the aviation field and provides valuable reference for researchers and engineers in various robotic applications

Web-Based Control and Robotics Education Spyros G. Tzafestas,2009-07-31 For the things we have to learn before we can do them we learn by doing them Aristotle Teaching should be such that what is offered is perceived as a valuable gift and not as a hard duty Albert Einstein The second most important job in the world second only to being a good parent is being a good teacher S G Ellis The fast technological changes and the resulting shifts of market conditions require the development and use of educational methodologies and opportunities with moderate economic demands Currently there is an increasing number of educational institutes that respond to this challenge through the creation and adoption of distance education programs in which the teachers and students are separated by physical distance It has been verified in many cases

that with the proper methods and tools teaching and learning at a distance can be as effective as traditional face to face instruction Today distance education is primarily performed through the Internet which is the biggest and most powerful computer network of the World and the World Wide Web WWW which is an effective front end to the Internet and allows the Internet users to uniformly access a large repertory of resources text data images sound video etc available on the Internet
