## Circumference of Circles

Circumference is the distance around the edge of a circle. It is the perimeter of the circle.

To find the **circumference** of a circle, multiply **PI** by the diameter of the circle.

What is Pi? Pi, or  $\pi$ , = 3.14159265359..., but we will call it 3.14.

The **diameter** of the circle is the measurement of any line segment that passes through the center of the circle and whose endpoints lie on the circle.

**Radius** is half the diameter.
