Chapter-6 Integers

Exercise 6.3

Q.1 Find

(a) $35 - (20)$ (b) $72 - (90)$

(c) $(-15) - (-18)$ (d) $(-20) - (13)$

(e) $23 - (-12)$ (f) $(-32) - (-40)$

Solution:

We use the concepts of positive and negative [integers](#) and [subtraction](#) to find the values of the given expressions.

(a) $35 - (20) = 35 - 20 = 15$

(b) $72 - 90 = -18$

(c) $(-15) - (-18) = (-15) + (18) = 3$

(d) $(-20) - (13) = -(20 + 13) = -33$

(e) $23 - (-12) = 23 + 12 = 35$

(f) $(-32) - (-40) = (-32) + 40 = 8$

Q.2 Fill in the blanks with >, < or = sign.

(a) $(-3) + (-6)$ _____ $(-3) - (-6)$

(b) $(-21) - (-10)$ _____ $(-31) + (-11)$

(c) $45 - (-11)$ _____ $57 + (-4)$

(d) $(-25) - (-42)$ _____ $(-42) - (-25)$

Solution:

We use the concepts of positive and negative [integers](#) and [addition](#) and [subtraction](#) to fill in the blanks with >, < or = sign. Let us solve LHS and RHS separately and then we compare the values on both sides.

(a) LHS = $(-3) + (-6) = -3 - 6 = -(3 + 6) = -9$

RHS = $(-3) - (-6) = (-3) + 6 = 3$

Essential Mathematics for the Physical Sciences, Volume 1 Brett Borden, James Luscombe, 2017-10-31 Physics is expressed in the language of mathematics; it is deeply ingrained in how physics is taught and how it's practiced. A study of the mathematics used in science is thus a sound intellectual investment for training as scientists and engineers. This first volume of two is centered on methods of solving partial differential equations (PDEs) and the special functions introduced. Solving PDEs can't be done, however, outside of the context in which they apply to physical systems. The solutions to PDEs must conform to boundary conditions: a set of additional constraints in space or time to be satisfied at the boundaries of the system that's a small part of the universe under study. The first volume is devoted to homogeneous boundary value problems (BVPs), homogeneous implying a system lacking a forcing function or source function. The second volume takes up, in addition to other topics, inhomogeneous problems where, in addition to the intrinsic PDE governing a physical field, source functions are an essential part of the system. This text is based on a course offered at the Naval Postgraduate School (NPS) and while produced for NPS needs, it will serve other universities well. It is based on the assumption that it follows a math review course and was designed to coincide with the second quarter of student study, which is dominated by BVPs but also requires an understanding of special functions and Fourier analysis.

The Five Practices in Practice [Middle School] Margaret (Peg) Smith, Miriam Gamoran Sherin, 2019-02-12 Take a deep dive into the five practices for facilitating productive mathematical discussions. Take a deeper dive into understanding the five practices: anticipating, monitoring, selecting, sequencing, and connecting for facilitating productive mathematical conversations in your middle school classrooms and learn to apply them with confidence. This follows up to the modern classic *Five Practices for Orchestrating Productive*

Mathematics Discussions shows the five practices in action in middle school classrooms and empowers teachers to be prepared for and overcome the challenges common to orchestrating math discussions. The chapters unpack the five practices and guide teachers to a deeper understanding of how to use each practice effectively in an inquiry oriented classroom. This book will help you launch meaningful mathematical discussion through Key questions to set learning goals, identify high level tasks, anticipate student responses and develop targeted assessing and advancing questions that jumpstart productive discussion before class begins. Video excerpts from real middle school classrooms that vividly illustrate the five practices in action and include built in opportunities for you to consider effective ways to monitor students ideas and successful approaches for selecting sequencing and connecting students ideas during instruction. Pause and Consider prompts that help you reflect on an issue and in some cases draw on your own classroom experience prior to reading more about it. Linking To Your Own Instruction sections help you implement the five practices with confidence in your own instruction. The book and companion website provide an array of resources including planning templates, sample lesson plans and completed monitoring tools and mathematical tasks. Enhance your fluency in the five practices to bring powerful discussions of mathematical concepts to life in your classroom. This book takes 5 Practices for Orchestrating Productive Mathematics Discussions to the next level as readers experience what these practices look like in real mathematics classrooms in middle school. The authors specifically address the challenges one might face in implementing the classrooms by providing recommendations and concrete examples to avoid these challenges. This book is a must read for teachers who want to amplify their classroom implementation of the five practices. Cathy Martin, Executive Director of Curriculum Instruction, Denver Public Schools.
