Math Makes Sense!: A Constructivist Approach To The Teaching And Learning Of Mathematics Ana Helvia

Quintero, Hector Rosario, 2016-03-02 The methods for teaching mathematics usually follow the structure of mathematics. The problem with this is that the structure of mathematics took centuries of elaboration to develop and is not the same as how one originally experiences mathematics. Based on research of how mathematics is actually learned, this book presents an innovative approach for teaching mathematics that will engage pupils and can have lifelong benefits for how they take on board more advanced mathematical topics. Math Makes Sense makes use of the realistic mathematics education (RME) philosophy which bridges the gap between informal mathematics learning such as in day to day life and more formal teaching in school. Many real life situations as examples for learning are included as well as different mathematical and logic puzzles that will stimulate learning and foster understanding. The ideas presented are not confined to one national curriculum and so can be helpful worldwide to teachers, instructors both in practice and those still in training, private tutors, homeschooling parents and educational researchers.

**Activities Manual for Elementary School Teachers - Mod Math** Wheeler, 1995 This book was published exclusively with the goal of preparing students to be future elementary school teachers. This four color book is exactly the same as Wheeler and Wheeler's Modern Mathematics Ninth Edition with the following additions. The preface was written directly with the goal of educating elementary school teachers. NCTM Standards are included in the book's end papers and Reproductions of actual pages from four color elementary school textbooks have been added. Guided by a team of reviewers and suggestions from more than 130 professors, the authors have produced an important revision. At the beginning of each section, goals and objectives have been replaced by statements from the NCTM Standards. Within each section, the authors present the content, examples, problem sets, and laboratory exercises that fulfill the philosophy and the direction suggested by the Standards. In this edition, Ruric Wheeler is joined by his son Ed as co-author. An activities manual for prospective elementary school teachers has been completely rewritten by a team of authors with many years of experience teaching elementary and middle school students. In addition to a rich variety of activities, it includes Talk to Teachers, a section that discusses the significance of each activity in the growth and preparation of the young student.
