Literacy Today Dennis Adams, 2014-02-04 This book defines literacy broadly as it explores concepts within core subjects and shows how to make standards based literacy the goal and outcome of school reform It imagines a future digital medium where educational technology is worthy of the spirit our children bring to it Classrooms and schools centered on learners and learning can be intellectually exciting places This book attends to that concern while giving a great deal of attention to connecting overlapping themes to good teaching Literacy Today sets out to challenge teachers to make literacy and learning more relevant and lasting for their students By providing a standards based context for connecting basic subjects it encourages teachers to reflect upon their practices while building a conceptual framework for new directions and new approaches to the curriculum As the concept of literacy expands to meet the needs of today's complex world teachers need all the assistance that they can get The standards movement does not authoritatively tell teachers what to do rather it helps them make decisions about what to teach what to spend time on and what to eliminate from the curriculum This book gives teachers a road map and a literacy intensive destination It highlights

some of the better routes and helps teachers with good activities and professional development along the way Math Advantage Grace M. Burton,1999 **Go Be a Writer!** Candace R. Kuby,Tara Gutshall Rucker,2016-04-15 This book provides an introduction to poststructural and posthumanist theories in order to imagine new possibilities for expanding literacy education The authors put to work these theories in the context of an elementary school classroom examining literacy based activities that occur as students participate with materials in a multimedia writers studio Focusing on literacy processes the book emphasizes the fluid and sometimes unintentional ways multimodal artifacts come into being through intra actions with human and nonhuman materials Because these theories emphasize the unplanned nonlinear aspects of literacy the authors demonstrate an approach to literacy that works against the grain of standardization and rigid curricular models Go Be a Writer reveals that when educators appreciate the value of unscripted intra actions they allow for more authentic learning The Mathematics Experience Mary Ann Haubner,1992 Resources in Education ,1984

Teachers Make the Difference ,1997 Literacy in Science, Technology, and the Language Arts Mary Hamm,Dennis Adams,1998-10-30 Technology a product of science is pushing against the linear boundaries of traditional storytelling Moving in the direction of multiform stories and digital formats takes literacy well beyond the 3Rs Students increasingly need to be critical and creative users of the new media As the Internet becomes faster more visually powerful and easier to manipulate there will be an explosion of virtual environments with literacy taking on a whole new meaning While the word literacy has become almost synonymous with the word competence the authors prefer the definitions found in the new language arts and science standards For example the National Science Education Standards suggests that scientific literacy implies that a person can identify scientific issues underlying national and local decisions and express positions that are scientifically and technologically informed As this book explores important new dimensions of linguistic and scientific literacy it looks at developing literacies not covered well in schools today It is the authors belief that an understanding of science and the processes of science can make major contributions to the ability to learn reason make decisions and solve problems Thus learning about the natural world helps develop intellectual tools of inquiry that can be used with the language arts and other disciplines Interdisciplinary activities can help develop the skills in both science and language that are becoming so essential for personal fulfillment performing in the workplace and being an informed citizen This book is designed as a supplementary text for methods classes in elementary science and language arts education It is also intended as a resource and guide for preservice and inservice elementary and middle school teachers *Instructor* ,2002 **Indiana Media Journal** ,1997

The Virginia Mathematics Teacher ,1996 **VocEd** ,1983 *The School Projects Idea Book* Michelle Davis,2003-05 Comprehensive teacher s resource book that provides 30 creative projects for teachers to give their students *Content Area Literacy* Robin Eanes,1997 This text focuses on methods for helping teachers develop their students literacy skills to enhance learning of content subject matter across all disciplines It pulls together some of the most current and popular

strategies and techniques in content area literacy These strategies and techniques have been carefully selected for their ease of application and adaptation by classroom teachers in any classroom at any level **Helping Your Child Learn Math**
