## **Math Problem Using Family Feud:**

Solving The Price Is Right Justin L. Bergner, 2023-03-15 The Price is Right is television's longest running game show. Since its inception in 1956, contestants have won cars, tropical vacations, diamond jewelry, even a live horse, and the hosts' excited catchphrase "Come on down" has become part of our everyday vernacular. Part of the program's enduring appeal is the apparent ease of the game: guessing the cash value of certain prizes. But if that's the case, then why do so many contestants come away from the show empty-handed? *Solving The Price is Right* is an in-depth exploration of the underlying probability theory of the popular television program that explores how biases and behavioral pitfalls limit our ability to successfully apply logic and math both on and off the show. With rigorous data and analysis compiled from Seasons 47 and 48 (356 total episodes), investor and math practitioner Justin L. Bergner draws strategic and mathematical insights from all facets of the show, from Contestant's Row bidding to the Showcase Showdown and all 77 Pricing Games, using a combination of game theory, probability theory, statistics, and pattern recognition. In each section, Bergner summarizes contestant performance, highlights the biases leading to sub-par outcomes, and shows how outcomes can be improved by executing the right strategies while avoiding cognitive biases. Throughout, Bergner applies the lessons learned to the fields of business, finance, and our real lives, shedding light on themes of reverse psychology, strategic patience, and the importance of establishing what is sufficient for success in our pursuits. The result is a truly unique and meticulously researched book that uses *Solving The Price is Right* as a lens to examine our own choices and how to make better ones. **Bridging Learning** Mandia
