PARCC's False Rigor Stunts the Academic Growth of All Students. White Paper Mark McQuillan, Richard P.
Phelps, Sandra Stotsky, 2015 In July 2010 the Massachusetts Board of Elementary and Secondary Education BESE voted to
adopt Common Core s standards in English language arts ELA and mathematics in place of the state s own standards in these
two subjects The vote was based largely on recommendations by Commissioner of Education Mitchell Chester and then
Secretary of Education Paul Reville and on the conclusions in three studies comparing the state s standards with Common
Core s all financed directly or indirectly by the Bill it is motivated by our interest in providing an analysis of how MCAS and
PARCC assess reading and writing Much less national attention has been paid to Common Core based assessments of
reading and writing than of mathematics yet reading and writing skills are just as important to readiness for college and
career as is mathematics This White Paper s central recommendation is that Massachusetts use a testing system for K 12
that is much less costly more rigorous academically and much more informative about individual student performance and
with much less instructional time spent on test preparation and administration than the current PARCC tests Both the PARCC
tests and the current MCAS tests in grade 10 are weak albeit for different reasons and neither indicates eligibility for a high
school diploma college readiness or career readiness In essence the authors recommend that BESE reject the PARCC
assessment system and vote for the MCAS system but on the condition that the responsibility for developing and
administering K 12 standards and tests be assigned to an organization in Massachusetts independent of DESE and the state s
education schools This organization must focus squarely on providing the best possible content standards from disciplinary
experts in the arts sciences and engineering throughout the state and be capable of providing oversight of high school

standards and tests If carried out these recommendations would ensure the legacy and future promise of MERA The following are appended 1 Critique of Criteria for Evaluating Common Core Aligned Assessments 2 Links to Public Hearings and Other Sources of Public Comment on MCAS or PARCC and 3 A Randomly Chosen Test Item Used on the 2014 Grade 10 MCAS Math Test Also provided are additional recommendations an about the authors section and endnotes *Workbook - Grade 10 Math with Answer Key* Eran Levin,2014-10-15 This is a Student workbook for the Grade 10 students with full answer key More info and free material can be found at <http://ibmathworkbooks.weebnode.es> The index of the workbook is
