Evidence-Based Inquiries in Ethno-STEM Research Iman C Chahine, Josef de Beer, 2021-01-01 The purpose of the edited volume is to provide an international lens to examine evidence based investigations in Ethno STEM research Ethno science Ethno technology Ethno engineering and Ethno mathematics These themes grew out of multi national multi institutional and multi disciplinary efforts to preserve as well as epitomize the role that Indigenous Knowledge Systems IKS play in cognitive development and its vital contributions to successful and meaningful learning in conventional and non conventional contexts Principled by the Embodied Situated and Distributed Cognition ESDC this innovative book will provide evidence supporting the embeddedness of a thinking in acting model as a fundamental framework that explains and supports students acquisition of scientific knowledge So often western science curricula are experienced as irrelevant since it does not take cognizance of the daily experiences and world in which the learner finds himself This book takes a socio cultural look at IKS and applies research in neuroscience to make a case its incorporation in the STEM Science Technology Engineering and Mathematics classroom We use the Embodied Situated Distributed Cognition ESDC Model as conceptual framework in this book Although the value of IKS is often acknowledged in curriculum policy documents teachers are most often not trained in incorporating IK in the classroom Teachers lack of the necessary pedagogical content knowledge PCK in effectively incorporating IK in their classrooms is a tremendous problem internationally Another problem is that IK is often perceived as pseudo science and scholars advocating for the incorporation of IK in the school curriculum often do not contextualize their arguments within a convincing theoretical and conceptual framework

Visualisation and Epistemological Access to Mathematics Education in Southern Africa Marc Schäfer, 2023-04-27 This book demonstrates that using visualisation processes in mathematics education can help to enhance teaching and learning and bridge the inequality gap that exists between well resourced and under resourced schools in Southern Africa Drawing on classroom research conducted in the Southern African region it examines how epistemological access in a context of gross inequality can be constructively addressed by providing research based solutions and recommendations The book outlines the visualisation process as an integral but often overlooked process of mathematics teaching and learning It goes beyond the traditional understanding of visualisation processes such as picture forming and using tools and considers visualisation processes that are semiotic in nature and includes actions such as gestures in combination with language It adds value to the visualisation in mathematics education research discourse and deliberation in Africa With a unique focus on Southern Africa and open avenues for further research and collaboration in the region it will be a highly relevant reading for researchers academics and post graduate students of mathematics education comparative education and social justice education

**River Delta Futures** Francisco-J. Hernández Adrián, Angelos Theocharis, 2025-02-20 How are climate change weather related disasters food and water insecurity and energetic and infrastructural collapse narrated audiovisually in the most environmentally vulnerable areas of the Planet This book

addresses this and related questions by adopting a local and transdisciplinary perspective on river deltas from different areas of the world. River deltas have historically been hotspots for human civilizations as populations settled in their fertile grounds seeking resources and opportunities for prosperity. Despite this, the terrains and livelihoods of those who rely on them are under threat from human exploitation, environmental degradation, and rapidly accelerating climate change. Inspired by the UN Sustainable Development Goals, this book provides a range of focused audiovisual analyses of deltaic spaces. Ranging across a variety of media including documentary filmmaking, animation, photography, collaborative comic making, participatory visual art practices, soundwalking, and film analysis, it examines the role that contemporary audiovisual media play in forging global environmental imaginaries. In doing so, it adopts a transdisciplinary approach to the Blue Humanities from countries across the world including Canada, Bolivia, Brazil, Greece, Nigeria, Senegal, India, Bangladesh, Myanmar, Thailand, and Vietnam.
