Arlene Savage, (E-mail: savage@oakland.edu), Oakland University

Abstract

This paper evaluates our current Accounting Information Systems (AIS) curriculum, developed using a Model-Oriented, Tool-Enhanced (MOTE) framework, by comparing it to the recommendations of the International Federation of Accountants' (IFAC) Guideline No. 11. The IFAC recommendations offer guidance on the information technology content in accounting curricula and are supported by the AICPA. The evaluation resulted in suggestions for improvements to our existing curriculum. An analysis of the guideline was also completed.

Introduction

There are a variety of approaches to develop meaningful and relevant Accounting Information Systems (AIS) curricula. Over the past several years, a number of people (e.g., Borthick, 1996; Davis & Leitch, 1988; Groomer & Murthy, 1996; Macur, 1998) have expressed the need for curriculum reform and described existing curricula. It is also well documented that AIS is still taught very differently at different institutions (e.g., Hall, 1998; Macur, 1998; Smith & Bain, 1993). However, little research has been conducted in evaluating

AIS curricula against the International Federation of Accountants' (IFAC) International Education Guideline (IEG) 11, "Information Technology In The Accounting Curriculum" (IFAC, 1998, hereinafter IEG 11). This guideline is supported by the AICPA (1996), and is the only authoritative AIS curriculum guidance offered since 1987, when the AAA Committee on Contemporary Approaches to Teaching Accounting Information Systems recommended curricular objectives for AIS (AAA, 1987; Macur, 1998). The purposes of this paper are to assess an existing AIS curriculum, by evaluating it against the IFAC recommendations, and to analyze the IFAC guideline.
