Teaching Learners with Visual Impairment Maximus M. Sefotho, Ronél Ferreira, 2020-12-31 This book *Teaching Learners with Visual Impairment* focuses on holistic support to learners with visual impairment in and beyond the classroom and school context. Special attention is given to classroom practice, learning support, curriculum differentiation and assessment practices to mention but a few areas of focus covered in the book. In this manner, this book makes a significant contribution to the existing body of knowledge on the implementation of inclusive education policy with learners affected by visual impairment.

Research for Educational Change Jill Adler, Anna Sfard, 2016-06-17 *Research for Educational Change* presents ways in which educational research can fulfil its commitments to educational practice. Focussing its discussion within the context of mathematics education, it argues that while research generated insights can have beneficial effects on learning and teaching, the question of how these effects are to be generated and sustained is far from evident. The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice. In the first part of the book, four teams of researchers use different methodologies while analysing the same corpus of data collected in a South African mathematics classroom. In the second part, each of these teams makes a specific proposal about what can be done and how so that its research generated insights have a tangible beneficial impact on what is happening in mathematical classrooms. Combining two discourses, that of researchers speaking to one another and that of researchers communicating their insights to those responsible for educational practice, the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education, educational research and classroom practices. This book will be key reading for postgraduates, researchers and academics in education and particularly in the areas of mathematics education, education research, teacher education and classroom practice. It will also appeal to teacher educators, practitioners and undergraduate students interested in educational research.

Education Annual Volume 2023, 2023-12-13 Educational research and innovation are directed towards defining, implementing and evaluating the principles guiding teaching and educational practices with the fundamental purpose of improvement. The chapters comprising this monographic volume constitute valuable contributions to this objective, adopting an inter and transdisciplinary perspective, a particularly sought after aspect in the field of international educational studies. They address issues that transcending their curricular context, delve into broader frameworks and contribute to addressing current educational challenges. Ultimately, this volume focuses on new curricular, methodological and resource evaluation orientations and developments. It aims to provide responses that foster the development of critical and creative thinking skills, competency based learning, informed decision making and the promotion of quality teacher training. These perspectives draw from the most recent international scientific literature, solidifying their rigor and ensuring their scientific value.

Social Justice and Transformative Learning Sandra M.

Tomlinson-Clarke, Darren L. Clarke, 2016-03-10 The similarities between the United States and South Africa with respect to race power oppression and economic inequities are striking and a better understanding of these parallels can provide educational gains for students and educators in both countries Through shared experiences and perspectives this volume presents scholarly work from U S and South African scholars that advance educational practice in support of social justice and transformative learning It provides a comprehensive framework for developing transformational learning experiences that facilitates leadership for social justice and a deeper understanding of the factors influencing personal national and global identity *South Africa Yearbook 2004/05 Government Communication & Information System (South Africa), 2004*

Using Multimodal Representations to Support Learning in the Science Classroom Brian Hand, Mark

McDermott, Vaughan Prain, 2015-11-06 This book provides an international perspective of current work aimed at both clarifying the theoretical foundations for the use of multimodal representations as a part of effective science education pedagogy and the pragmatic application of research findings to actual classroom settings Intended for a wide ranging audience from science education faculty members and researchers to classroom teachers school administrators and curriculum developers the studies reported in this book can inform best practices in K 12 classrooms of all science disciplines and provide models of how to improve science literacy for all students Specific descriptions of classroom activities aimed at helping infuses the use of multimodal representations in classrooms are combined with discussion of the impact on student learning Overarching findings from a synthesis of the various studies are presented to help assert appropriate pedagogical and instructional implications as well as to suggest further avenues of research Transforming Public Education in Africa, the Caribbean, and the Middle East Cynthia S Sunal, Kagendo Mutua, Oluseyi Matthew Odebiyi, 2019-05-01 Public education has expanded to serve large populations across the regions of Africa the Caribbean and the Middle East Many nations in these regions are moving into a phase of public education in which a variety of factors are being identified as influencing the quality of public education and its ability to serve all children and adolescents It has become evident that ethnic background gender religious affiliation and ability disability are important factors in who is served and how well the individual is served The chapters in this volume Book 8 of Research on Education in Africa the Caribbean and the Middle East document and describe the status success and limitations of public education s efforts at transformation They provide points from which further research and practice might occur National Report on Schooling in Australia, 1990 Australian Education Council, 1991 The annual national report will provide commentary on the operation of school systems and participation of students in schooling report on the school curriculum describe student outcomes and summarise the application of financial resources to schools A major aim of the the report is to raise public awareness of schooling in Australia by providing an authoritative source of information on various aspects of schooling and a sound basis for informed comment It will also be used to report on topics of national interest to highlight important national and State initiatives in schooling and to draw

public attention to particular schooling activities or programs At the same time the contents of the Report and the Statistical Annex will provide an avenue for satisfying the legal requirements for the Federal Government to account for the expenditure of Commonwealth funds on schooling *Mathematical Literacy* S.
