Kalyani University Geography Question Paper

Urmi Sengupta, Kenneth Nielsen

Kalyani University Geography Question Paper:

Rethinking Displacement: Asia Pacific Perspectives Kuntala Lahiri-Dutt, 2016-04-08 This book responds to the need to explore the multitude of interconnected factors causing displacements that compel people to move within their homelands or traverse various borders in the contemporary world that is characterised by extensive and rapid movements of people. It addresses this need by bringing together historical and contemporary accounts and critical examinations of the displaced by articulating the commonalities in their lived experiences. It accomplishes the task of charting a new path in displacement studies by offering a number of studies from interdisciplinary and diverse methodological approaches comprising ethnographic and qualitative research and literary interpretations to emphasise that although the forms and conditions of mobility are highly divergent, individual experiences of displacement and placelessness offer a critical challenge to the artificial categorisations of people's movements. Each chapter adds insights into the different configurations of displacement and placement and offers fresh interpretations of migration and dislocation in today's rapidly changing world. The contributors critically examine a variety of displacement processes and experiences in the context of war, tourism, neoliberal policies of development and the impact of various agro-forestry policies. They focus on a range of countries enabling a thorough comparative analysis in terms of scope and range of examples and methods of analysis. This book makes an original contribution to the growing body of literature on displacement and will appeal to a wide readership including advanced undergraduates and graduate students and professors in disciplines such as human geography, development studies, sociology and anthropology, regional studies and comparative impact assessment. Modern Cartography for Ocean & Land Management, 1999

The Politics of Urban Land in South Asia Urmi Sengupta, Kenneth Nielsen, 2025-03-18 Cities in South Asia are homes to one of the highest concentrations of people anywhere in the world and the allocation of land and urban resources and the benefits that can be derived from them in this region have become increasingly contested. This book explores the politics of urban land in South Asia and the challenges related to their respective urban futures. For most people, land comes at a premium and as a result, conflicts and contestations over land and urban resources are rife in countries such as India, Bangladesh, Pakistan, Sri Lanka and Nepal, as witnessed in the many struggles of low-income groups and vulnerable or marginalised communities to fight off dispossession or displacement. This book maps current challenges shared across national borders and charts out new directions for future research and land policy. With contributions from emerging and established authors, the book offers a critical accounting of the situation that exists in urban South Asia while also critically engaging with the current challenges and future directions for land use and land politics. The book will be useful to students and researchers of public policy, development studies, economics, urban and regional development studies and sociology, as well as to policy makers, real estate professionals and commercial firms engaged in property market real estate study in Asia.
